Coroner—  
Hiram H. Holke.....16  
Clerk of the Circuit Court—  
Charles Kraske.....15  
A. B. Bever.....29  
District Attorney—  
C. B. Edwards.....40  
John Roberts.....7  
Register of Deeds—  
John Hoffman.....42  
Henry Blum.....8

### AUSTRIAN EMPEROR DIED WEDNESDAY

Franz Joseph, emperor of Austria, died on Wednesday after an illness of several years. The aged ruler had been in a precarious condition for some time past, and hourly bulletins had been given out by the attending physicians, and it was a marvel how he retained the spark of life as long as he did.

The new ruler of Austria is Karl Franz, a grand nephew of the dead emperor. He is 29 years old and has been commanding the troops on the Transylvania front. He is a nephew of the Archduke Franz Ferdinand, who with his wife, was slain by a Serbian assassin in June, 1914. This double murder was the cause of the present war.

### MAY BUILD TWO SCHOOLS

A meeting will be held in school district No. 2 in the town of Grand Rapids Saturday night for the purpose of making the arrangements for a new school house in that district.

It is expected that there will be some effort made to have a school built in another part of the district as under the conditions as the existed before it was necessary for the children, or a part of them, to walk a long distance in order to attend school.

### EAT MEAT

And reduce the high cost of living by buying your meat at the New Meat Market.

### CURIOSITIES OF PAST GENERATIONS

For some time past there has been exhibited at the library a number of curios in the shape of ancient dishes and devices such as were used by our grandfathers, and those who have seen them have not hesitated to pronounce the exhibit well worth the time necessary to look it over.

The D. A. R. has on exhibition a number of things this week, among which are the following:

A blue flowered coffee pot, brought from Luxemburg, France, by Mrs. Larry Nash's grandmother over 90 years ago.

A blue and white plate, over 100 years old, owned by Mrs. J. Bell, Jr. Sugar bowl, three generations in the family, owned by Mrs. Arroy.

Tea pot and tray, over 100 years old, loaned by Mrs. Will Raymond.

Many colored plate from Canada, owned by Mrs. Kate Pepin.

Card dish, brought to Grand Rapids in 1863, owned by Mrs. Iva Babcock.

A brass pestle and mortar, made by an uncle of Mrs. O'Day, was put on wall paper at Vicksburg, Mississippi, Tuesday, July 2, 1863. Among other things printed, "Grant's forces did a little firing today, but the expectations of the Yankees were not realized by a good deal." At the end of the fourth column, "this will be the last of the wall paper editions as Grant has us." Loaned by Miss Ida Hayward.

A three-column page of the Milwaukee Journal, November 16, 1850. Loaned by G. A. R. A framed collection of old paper money used during Civil War, 15c, 25c and 50c, called shin plasters.

Twelve pieces of Confederate paper money, given by the library to the government. This money was issued six months after peace had been declared between the North and South. It is in \$10, \$20 and \$50 bills.

### WHEN THE MEN WERE KIDS

From an unidentified exchange:

Why all this rant and raving about the high cost of living? Forty and fifty years ago, when most of the men of today were kids, we blackened our boots, mother trimmed the surplus locks from our cranium, we went swimming without the modern bathing suit, mother and sisters knit and sewed our socks, we wore old-fashioned boots or went bare-foot, never saw what is called underwear and overcoats today—just a home-made woolen shirt and two-piece suits; ate mush and milk, home-made breads, good meats and vegetables. Did you guzzle life? Well, you did. Just observe the living conditions of today—the shoe shining parlors, the modern barber shops, the chiropractors, and manicurists, bath houses, cleaning and pressing establishments, laundries, candy kitchens and fancy drinking parlors, expensive restaurants, hotels, clay stores, automobiles, other luxuries and non-essentials, blues, garages, telephones and numerals. Still the people are not satisfied—they want more luxuries, more time to enjoy them.

### GRANTED A DIVORCE

Mrs. Phyllis Warren was granted a divorce from Loren Warren by Judge Park in a recent decision handed down by him in a case that was tried during the recent term of the circuit court. Mrs. Warren is given the custody of the children, the homestead and personal property and the court orders Mr. Warren to pay the sum of \$12.00 per month.

It would seem as if this plan of raising a few thousand dollars each year for the purpose of improving the roads was a waste of time and money. The time may come when we will have good roads, but it will be so long in the future that it will be of no use to them. It might clear out the debt, but it will ever get any use of them. We have been building roads, good roads, for several years now, but still we have but very little to show for the money expended. Already some of the first roads that were built have gone to pieces so that it will be necessary to build them over within a short time, and this before any considerable stretch of road has been built. There are a few counties in the state that have taken the bull by the horns and instead of building a few miles a year, have bonded the county for enough to put in a few trunk lines, and these are now in use and the people of the county are getting the good out of them while they are being paid for. It would seem as if the proper thing to do is to bond Wood county in the same manner and have some roads built that are right and that will last for a few years. Why not start the matter at once and have the agony over with.

P. J. Powers, who has had charge of the sale of lots in a roadside addition during the past fall, has gone coming of winter having put to Spooner to visit with relatives, the damper on the real estate business for the present.

### DON'T LIKE PRESENT LAW

A number of our esteemed contemporaries claim that the present deer law should be repealed because the deer hunters are not observing it, and for that reason it is not a good law. They claim that hunters shoot all the deer they see just the same as they did before the law was passed, and after a deer is shot they decide whether or not he is of the sex that is wanted, and if it is a buck the animal is taken to camp, and if it is a doe it is left lying in the woods. In view of the fact that hunters are committed in spite of the laws to the contrary, why would it not be right to modify the law concerning murder so that the offender would get only thirty days in jail, or else be allowed to go altogether? Is this not the same principle that would apply in case the deer law was modified because the old law was not observed?

Nine out of ten men do not care a whoop whether there are any deer or not. They do not hunt them; do not care for the meat, and are not interested in the matter in the least. It is safe to say that a large majority of the men of the state would consider it a benefit to mankind in general if there were no more deer in the state.

What laws have been made have been for the benefit of the deer hunters, and nobody else. They have not been for the farmer, the merchant, nor any man who remains at home and conducts himself in a peaceable and gentlemanly manner. It is an effort on the part of the lawmakers to fix things so that the hunter can kill deer every year and still have a plentiful supply left to stock the forest. Up to date the game laws have not been particularly successful in accomplishing this result, and it is doubtful if such a thing will ever be brought about. There have been game laws for more than forty years, and yet, in spite of this fact, the deer have gradually disappeared, until the time has come when in a week or more hunters can find no deer to get one it is necessary to go to a week or more hunting, and pay out a sum of money that represents many times the value of the animal from a food standpoint, and some who go after them do not get a deer even then.

It would be interesting to know just what hunters wanted in the law. There is no question but what the present law would accomplish the purpose for which it was framed in case it was observed. The law that existed before the present one was passed was also broken, as was evidenced by the arrests that were made right along, after we cannot say whether the deer were more numerous than the present law. However, as it was less stringent than the present one, it is safe to say that it was broken less. So far as can be seen, it does not make much difference what kind of a law exists, it would be broken anyway, and broken by the same men who broke the last. The trouble seems to be that there are a lot of men who want the law to apply to everybody but them, and are pained and indignant when they happen to get caught at breaking it.

The object of the present law was to reduce the number of deer killed and also to reduce the mortality among the hunters, but if the hunter does not want this done, the rest of us will never kick. It seems to be impossible to please them all, so why not open the thing wide open and let them come and go when they please. It might clear out the deer, but it would make it much safer for the hunter, and would certainly reduce the number of arrests.

CONOR-HATTEBERG

Marshall Times: The marriage of Miss Joyce Hattberg of this city to Mr. Benjam. A. Connor, of Aurora, took place Saturday at seven o'clock at the home of the bride's mother, Mrs. J. M. Hattberg, corner West Third and Chestnut streets. Miss Luella Rossmann and Dr. R. P. Potter attended the couple, and the ceremony, marked by its simplicity, was performed by Rev. P. H. Halsey. The only persons present in addition to the principals were Mrs. Hattberg, Mr. Ebbe of Pittsville and Mrs. Ambrose. The bride wore a simple gown of blue satin with a bouquet of lilacs of the valley. A wedding dinner was served after the ceremony.

Mr. and Mrs. Connor after a short wedding trip will begin housekeeping at the groom's comfortable residence at Auburnville. Mr. Connor is cashier of the Auburnville State Bank, and is a business man of prominence and recognized ability. Mrs. Connor, daughter of one of Marshall's oldest families, has taught school in Auburnville for several years, having been principal of the graded school there.

P. J. Powers, who has had charge of the sale of lots in a roadside addition during the past fall, has gone coming of winter having put to Spooner to visit with relatives, the damper on the real estate business for the present.

### STEVENS POINT IN SPASM OF REFORM

If one may judge by the reports that have been published in the newspapers, Stevens Point is at the present time undergoing one of the most remarkable spasms of reform that she has ever experienced. There was a time when Stevens Point had quite a reputation as a wide-open town, but for a number of years past the authorities there have gradually put the lid on until things have been running along with about the same regularity that they generally do in a town of that size.

However, some time ago the mayor took it into his head that there was too much gambling going on in that town, and the result was that several raids were made, and some of the offenders gathered in. Then some of the people thought that things were being closed down too tight and there was a threat of recalling the mayor. This made the mayor mad and he threatened to sue the newspaper that published the item about his being recalled. However, neither of these things came to a head, but the mayor has continued in his efforts to clean up the city and put the lawbreakers out of business.

The last sensational thing pulled off over there was on Friday afternoon when Mayor Walters personally arrested two men for shooting craps. When the cases were brought up for trial the mayor was unable to prove the men guilty and the result was that the two men were discharged. The people are now anxiously waiting for the next move.

### DEATH OF MRS. POMAINVILLE

Mrs. Caroline Pomainville, widow of the late Frank Pomainville, died at her home on the east side at 7 o'clock Wednesday evening after an illness of some length, death being caused by asthma and heart trouble. Mrs. Pomainville had been a sufferer from asthma for the past 35 years, but had been cheerful even in her trouble, and few knew that she had anything but the best of health.

Decceased, whose maiden name was Caroline Martin, was born on the 6th of May, 1848, at Kamouraspas, Quebec. She came to this country when she was 15 years of age and lived with Mr. and Mrs. Joseph Homier at Mosinee. She was married to Frank Pomainville on April 1, 1866, at Stevens Point, there being no Catholic priest in this city at that time, and has lived in this city ever since. She was the mother of eight children, four of whom are now living. She had three sons and five daughters, they being Dr. Frank Pomainville and Ed Pomainville of this city, and Dr. George Pomainville of Neokosa. There are also nine grandchildren.

Mrs. Pomainville was one of the old settlers of Grand Rapids, having lived here more than half a century, and was a lady that was beloved by all who knew her.

The funeral will be held at 10 o'clock Saturday morning from St. Peter and Paul church, Rev. Wm. Reading to conduct the services.

### MILL TAX PASSED BY COUNTY BOARD

Probably the most important measure passed by the present county board is the one mill tax, the proceeds of which are to be used for improving the trunk line between this city and Marshall. The matter was brought before the board for several days, and there was an abundance of discussion, and it was passed Wednesday afternoon by a majority of one vote.

This will make the sum of \$30,000 available for work on this road, and it is the biggest stride that has been made along this line. It is expected that the road will be surfaced with concrete as far as the money will allow, and that additional appropriations will be made as rapidly as possible until the entire road is finished.

The board also placed a bounty on crows, hawks and gophers. Crows will bring 15 cents a dozen, hawks 25 cents and gophers 10 cents.

### DEATH OF JOHN MEYER

John Meyer, one of the old residents of Wood county, died at the home of his son near Seneca Corners on Tuesday, November 21, after an illness of some length, cause of death being primarily old age, he being 79 years, 8 months and 5 days old.

Decceased was born in Germany, but came to this country when he was a young man, and has resided here in the town of Seneca since the early twenties, having followed farming until advancing age compelled him to retire from active life, since which time he has resided with his son. He is survived by four children, they being Mrs. John Sadow of Vesper; Mrs. Chris Brandt of Kellner; Mrs. August Stuke of the town of Hansen and John Meyer of the town of Seneca.

The funeral will be held Friday afternoon from the Lutheran church in the town of Seneca, Rev. Gieselman having charge of the services.

### STOCKHOLDERS MEETING

The stockholders of the Prentiss-Wabers company held a meeting on Monday evening to review the business of the concern. A committee was appointed to interview the different stockholders with a view to ascertaining if they would stand a 50 per cent assessment, and if so, the company will again commence operations. It is reported that most of the stockholders have expressed themselves favorably toward the plan and another meeting will be held in the near future to settle the matter.

### SKAT WINNERS

Those who took the prizes at the Skat tournament at the Elk club on Tuesday evening were as follows: L. M. Nash, first; J. R. Ragan, second; Dr. Boorman, third; J. F. Cooley, fourth; Walter Wood, fifth.

Marshall Times: Mrs. Adolph Zecher, who has been spending several months at Grand Rapids with her parents, Mr. and Mrs. Blinnese, since the departure of her husband for the border with Company A, was in the city part of the week visiting friends. Before leaving Saturday she stated that First Sergt. Zecher was planning to have her leave for San Antonio about December 1, and spend the balance of the winter there provided the regiment does not receive orders to move home before the first of the month.

### BOXING SHOW AT MARSHFIELD TOMORROW NIGHT

Friday evening, November 24, in the Armory hall, the Marshfield Athletic Association will open its second season of boxing with one of the most attractive cards yet offered, consisting of four bouts, a total of 30 rounds of the manly art. The two popular Marshfield boxers, Tommy Krieger and Kid Bhettler, are billed to appear in this exhibition. Both are reported to be better than ever at the game, which has aroused a lot of speculation as to how they will look now as against the last time they performed in the local arena, and this, coupled with the widespread interest in the card as a whole has created prospects of an exceptionally large attendance. Geo. Duffy of Milwaukee is on the program as referee, D. A. Kuhlans of this city as timekeeper. The boxes will weigh in at the Palm garden at 3 o'clock tomorrow afternoon.

The card follows:

Widup—Tommy Krieger of Marshfield vs. Al. Francis of St. Paul, 155 pounds, ten rounds.

Semi-widup—Jack Rose of Milwaukee vs. Kid Carter of Minneapolis, 138 pounds, eight rounds.

Preliminary—Kid Bhettler of Marshfield vs. Battling Johnson of Eau Claire, 133 pounds, six rounds.

Preliminary—Young Dosh of St. Paul vs. Carl Leonard of New Richmond, 128 pounds, six rounds.—Marshfield News.

### TRAVELING MEN HERE ON SATURDAY

Last Saturday the traveling men of Grand Rapids formed an organization in this city which is a branch of the U. C. T., and the name of which is the Heart of Wisconsin Council No. 575. The band turned out at noon and met the train from the south and as the weather was especially nice there was a large crowd on the streets, and with flags flying and hand playing it was a most joyful occasion.

After the members from the south had arrived in the city a line was formed and the procession marched to the Illinois hall, where the council was organized that afternoon. The work was done by the branch from Marshfield, assisted by the state officers. The following officers were elected for the branch in this city: Pres. Conslar—O. R. Roehus. Jr. Conslar—John J. Vane. Jr. Conslar—Geo. L. Warren. Sentinel—A. G. Mallette. Sec. Treas.—R. J. Mott. Conductor—Reginald MacKinnon. Page—R. H. Colby.

There were eighteen charter members to the new branch, and it is expected that the number will be taken in within a short time, so that there will be a pretty good-sized council here, and those who belong state that there will soon be a membership of something like fifty here.

After the ceremonies incident to organization, the members and the visitors partook of a banquet at the Hotel, which was served at the Dixon and Winter hotels, both popular places with the traveling public. As the banquet was free for the members, it is needless to state that it was thoroughly appreciated by all in attendance.

Among the state officers who were in attendance were A. B. Vanderhorst, grand consular of Oakshosh; B. A. Honeycomb, grand junior consular of Madison; grand secretary W. E. Spring of Madison; grand conductor Geo. B. Campbell of Marshfield; grand page E. O. Koehler of Milwaukee; grand sentinel J. G. Zigler of Chippewa Falls.

### ASYLUM MAKES MONEY

According to the annual report recently issued by the Wood county asylum for the insane, that institution has been making money ever since it was established, the total net earnings up to the present time being \$57,706.00. The net earnings for the past year are \$16,047.15.

In view of the facts as set forth in the report, we would suggest that several more asylums be built in different parts of the county, as the only thing that seems to be making any money these days are the insane asylums and paper mills.

The governing board of the asylum consists of Robert Connor, J. S. Thompson and W. H. Bean, and Mr. and Mrs. Gilson are superintendent and matron of the institution.

### HAPPY FELCH HERE

"Happy" Felch, four years ago a member of the local baseball team, but for the past couple of years playing with the Chicago White Sox, has been in the city several days during the past week shaking hands with his numerous friends.

"Happy" was quite a phenomenal hitter when he played with the local team, and it was this faculty that brought him into prominence among the big boys, and since he got into the company he has held up the reputation that he made in this vicinity.

### PLACES LARGE ORDERS

The Cox line has recently placed orders for new equipment involving an expenditure of \$1,250,000, according to an announcement made by President Edmund Pennington. The order includes 800 box cars and 200 automobile cars. The new cars will be built on the most modern lines and will be constructed of wood with steel framework, it is said. The cars are to be delivered next spring.

### ANOTHER ORNAMENTAL LIGHT

The electric company has placed an ornamental street light on the corner near the Wood County Bank. This is a much better looking proposition than the other ones that have been burning in that locality, but it looks as if it would cost considerable to install when compared with the other light.

### RECEPTION FOR PASTOR

A reception will be held at the Methodist church parlors on Friday evening, November 24th, for the new pastor and his wife, Rev. and Mrs. C. C. Becker. The congregation and friends of the church are invited to be present at the meeting.

### RAISE NOT WELCOMED

The raise in price to 8 cents a quart by the local milk trust is not being received with the welcome that might be expected. Housekeepers and farmers say that it is a pure case of greed, and not justified by the cost of production.

### ELECTION RECOUNT RESULTS IN A TIE

Owing to the fact that when all the returns were made the vote on register of deeds was very close, with the republican nominee leading with only a few, John Hoffman, the democratic nominee, demanded a recount, and the same was conducted at the court house last week, finishing up Saturday afternoon.

Those having charge of the recount were F. L. Brucke, W. T. Nobles and Frank Calkins, and the two contestants were represented by their attorneys, who watched every ballot on which there was any question as to the intent of the voter, and discussed the matter until it was settled to the satisfaction of all concerned. Mr. Hoffman was represented by Attorneys W. E. Whelan, A. J. Crowns and H. E. Fitch, and Mr. Blum was represented by Attorneys T. W. Brazeau and Charles E. Briere.

When it was all over it was found that the two candidates had received exactly the same number of votes and it was decided to settle the matter by flipping a coin. Frank Wagner was called in and given the dollar and instructed to spin the same, which he did. The democratic candidate selected "heads" and the republican "tails" and it landed tails up, and the result is that we will have a republican register of deeds during the next two years.

This was certainly the closest election that has occurred in this county in recent years, and there were a number of ballots that required considerable careful consideration before it could be told just what the voter intended to do. However, it was admitted by all that the utmost square was made to be perfectly square with both of the candidates, and when it was all over, they were both perfectly satisfied with the result.

### THE OFFICIAL FIGURES

The official canvass of the ballots cast in this state at the recent election has been completed and the majorities and pluralities of the successful candidates were found to be as follows:

President—Hughes, 27,478.  
U. S. Senator—La Follette, 116,658.

Governor—Phillips, 68,624.  
Lieut. Gov.—Dittmar, 80,654.  
Secretary of State—Hull, 90,537.  
Attorney General—Owen, 96,894.  
State Treasurer—Johnson, 93,373.

### MARRIED FORTY YEARS

Mr. and Mrs. S. H. Smart celebrated their fortieth wedding anniversary at their home on Thursday last week, on which occasion there were children and grandchildren in attendance to the number of fourteen. The time was spent in a very pleasant manner, and an excellent dinner was served. Mr. and Mrs. Smart are among the old residents of Grand Rapids, having been here for a quarter of a century.

### LIKE A LETTER FROM HOME

Alfred Omholt of Mukwonago in remitting a year's subscription to the Tribune says: "We certainly enjoy reading the Tribune. It comes like a message from home." He also states that they are getting along nicely there and that they like the country, having been located there for several years now. Mr. Omholt was formerly resident of Wood county and still has many friends here.

Herman H. Helke.....16  
Clerk of the Circuit Court—  
Charles Kruske.....15  
A. B. Dwyer.....23  
District Attorney—  
C. B. Edwards.....40  
John Roberts.....7  
Register of Deeds—  
John Hoffman.....42  
Henry Ebbe.....8

### AUSTRIAN EMPEROR DIED WEDNESDAY

Franz Joseph, emperor of Austria, died on Wednesday after an illness of several years. The aged ruler had been in a precarious condition for some time past, and hourly bulletins had been given out by the attending physicians, and it was a marvel how he retained the spark of life as long as he did.

The new ruler of Austria is Karl Franz, a grand nephew of the dead emperor. He is 29 years old and has been commanding the troops on the Transylvanian front. He is a nephew of the Archduke Franz Ferdinand, who with his wife, was slain by a Serbian assassin in June, 1914. This double murder was the cause of the present war.

### MAY BUILD TWO SCHOOLS

A meeting will be held in school district No. 2 in the town of Grand Rapids Saturday night for the purpose of making the arrangements for a new school house in that district. It is expected that there will be some effort made to have a school built in another part of the district, as under the conditions as the issue before it was necessary for the children, or a part of them, to walk a long distance in order to attend school.

### EAT MEAT

And reduce the high cost of living by buying your meat at the New Meat Market.

### CURIOSITIES OF PAST GENERATIONS

For some time past there has been exhibited at the library a number of curios in the shape of ancient dishes and devices such as were used by our grandfathers, and these curios have been seen there by the public and have been pronounced the exhibit worth the time necessary to look it over.

The D. A. R. has on exhibition a number of things this week, among which are the following:

A blue flowered coffee pot, brought from Luxembourg, France, by Mrs. Larry Nash's grandmother over 90 years ago.

A bug and white plate, over 100 years old, owned by Mrs. J. Bell, Jr. Sugar bowl, three generations in the family, owned by Mrs. Arnot.

Tea pot and tray, over 100 years old, loaned by Mrs. Will Raymond.

Mahogany colored tea set from Canada, owned by Mrs. Kate Pepin.

Card dish, brought to Grand Rapids in 1863, owned by Mrs. Iva Babcock.

A brass pestle and mortar, made by an uncle of Mrs. O'Day.

A four-column page printed on wall paper at Vicksburg, Mississippi, Tuesday, July 2, 1863. Among other things printed, "Grant's forces did a little thing today, but the expectations of the Yankees were not realized by a good deal." At the end of the fourth column, "This will be the last of the wall paper used during the Civil War, 1861 and 1865." Loaned by Miss Ida Hayward.

A three-column page of the Milwaukee Journal, November 16, 1860. Loaned by G. A. R. A framed collection of old paper money used during Civil War, 1861, 1862 and 1863, called shin plasters.

Twelve pieces of Confederate paper money, given by the library to the government. This money was issued six months after peace had been declared between the North and South. It is in \$10, \$20 and \$50 bills.

### WHEN THE MEN WERE KIDS

From an unidentified exchange:

Why all this rant and raving about the high cost of living? Forty and fifty years ago, when most of the men of today were kids, we were blown out of our cradles, we went swimming without the modern bathing suit, mother and sisters knit and darned our socks, we wore old-fashioned coats, we called underwear and overcoats today—just a home-made woolen shirt and two-piece suits; also mud and milk, home-made breads, good meat and vegetables. Did we cry life? Well, you bet we did. Just observe the living conditions of today—the shoe shining parlors, the modern barber shops, the cheap restaurants, and manicurists, bath houses, laundries, candy kitchens and fancy drinking parlors; expensive restaurants, hotels, cigar stores, automobiles, other luxuries and non-essentials, bills, garages, telephones and numbers. Still, the people are not satisfied—they want more luxuries, more time to enjoy them.

### GRANTED A DIVORCE

Mrs. Phyllis Warren was granted a divorce from Loren Warren by Judge Park in a recent decision handed down by him in a case that was tried during the recent term of court.

Mrs. Warren is given the custody of the children, the homestead and personal property and the court order Mr. Warren to pay the sum of \$12.00 per month.

It would seem as if this plan of raising a few thousand dollars each year for the purpose of improving the roads was a waste of time and money. The time may come when we will have good roads, but it will be so long in the future that none of the present generation will ever get any use of them. We have been building roads, good roads, for several years now, but we have but very little to show for the money expended. Already some of the first roads that were built have gone to pieces so that it will be necessary to replace them within a short time, and this before any considerable stretch of road has been built. There are a few counties in the state that have taken the bull by the horns and instead of building a few miles a year, have bonded the county for enough to put in a few trunk lines, and these are now in use and the people of the county are getting the good out of them while they are being paid for. It would seem as if the proper thing to do is to bond Wood county in the same manner and have some roads built that are right and that will last for at least once and have the agony over with.

### DON'T LIKE PRESENT LAW

A number of our esteemed contributors have published in the newspapers, Stevens Point is at the present time undergoing one of the most remarkable spasms of reform that has ever experienced. There was a time when Stevens Point had a reputation as a wide-open town, but for a number of years past the authorities there have gradually put the lid on until things have been running along with about the same regularity that they generally do in a town of that size.

However, some time ago the mayor took it into his head that there was too much gambling going on in that town, and the result was that several and were made, and some of the offenders gathered in. Then some of the people thought that things were being closed down too tight on the mayor. This made the mayor mad and he threatened to sue the newspaper that published the item about his being recalled. However, neither of these things came to head, but the mayor has continued his efforts to clean up the city and the lawbreakers out of business.

The last sensational thing pulled off over there was on Friday afternoon when two men for shooting craps. When the cases were brought up for trial the mayor was unable to prove the men guilty and the result was that the two men were let go. The people are now anxiously waiting for the next move.

### STEVENS POINT IN SPASM OF REFORM

If one may judge by the reports that have been published in the newspapers, Stevens Point is at the present time undergoing one of the most remarkable spasms of reform that has ever experienced. There was a time when Stevens Point had a reputation as a wide-open town, but for a number of years past the authorities there have gradually put the lid on until things have been running along with about the same regularity that they generally do in a town of that size.

However, some time ago the mayor took it into his head that there was too much gambling going on in that town, and the result was that several and were made, and some of the offenders gathered in. Then some of the people thought that things were being closed down too tight on the mayor. This made the mayor mad and he threatened to sue the newspaper that published the item about his being recalled. However, neither of these things came to head, but the mayor has continued his efforts to clean up the city and the lawbreakers out of business.

The last sensational thing pulled off over there was on Friday afternoon when two men for shooting craps. When the cases were brought up for trial the mayor was unable to prove the men guilty and the result was that the two men were let go. The people are now anxiously waiting for the next move.

### DEATH OF MRS. POMAINVILLE

Mrs. Caroline Pomainville, widow of the late Frank Pomainville, died at her home on the east side at 7 o'clock Wednesday evening after an illness of some length, death being caused by asthma and heart trouble. Mrs. Pomainville had been a sufferer from asthma for the past 35 years, but had been cheerful even in her trouble, and few knew that she had anything but the most ordinary ailments. Deceased, whose maiden name was Caroline Martin, was born on the 6th of May, 1841, at Kamourasp, Quebec. She came to this country when she was 15 years of age, and lived with her mother, Mrs. Joseph Houliar at Mosinee. She was married to Frank Pomainville on April 1, 1866, at Stevens Point, there being no Catholic priest in this city at that time, and has lived in this city ever since. There were eight children born to this union, two boys and six girls, they being Frank, Joseph, William, George, George, George, George, and George. Mrs. Pomainville was one of the old settlers of Grand Rapids, having lived here more than half a century, and was a lady that was beloved by all who knew her.

The funeral will be held at 10 o'clock Saturday morning from St. Peter and Paul church, Rev. Wm. Heine to conduct the services.

### MILL TAX PASSED BY COUNTY BOARD

Probably the most important measure passed by the present county board is the one mill tax, the proceeds of which are to be used for improving the trunk line between this city and Marshfield. The matter was up before the board for several days, and there was an abundance of discussion, and it was passed Wednesday afternoon by a majority of one vote.

This will make the sum of \$36,000 available for work on this road, and it is the biggest stride that has been made along this line. It is expected that the road will be surfaced with concrete as far as the money will allow, and that additional appropriations will be made as rapidly as possible until the entire road is finished.

The board also placed a bounty on crows, hawks and gophers. Crows will bring 15 cents apiece, hawks 25 cents and gophers 10 cents.

### DEATH OF JOHN MEYER

John Meyer, one of the old residents of Wood county, died at the home of his son near Seneca Corners on Tuesday, November 21, after an illness of some length, cause of death being primarily old age, he being 79 years, 3 months and 5 days old.

Deceased was born in Germany, but came to this country when he was a young man. He has resided in the town of Seneca since the early seventies, having followed farming until advancing age compelled him to retire from active life, since which time he has resided with his son. He is survived by four children, they being Mrs. John Seadow of Vesper; Mrs. Chris Brandt of Kellner; Mrs. August Stale of the town of Hansen and John Meyer of the town of Seneca.

The funeral will be held Friday afternoon from the Lutheran church in the town of Seneca, Rev. Gieseler having charge of the services.

### STOCKHOLDERS MEETING

The stockholders of the Prentiss-Wabers company held a meeting on Monday evening to review the business of the concern. A committee was appointed to interview the different stockholders with a view to ascertaining if they would stand a 50 per cent assessment, and if so, the company will again commence operations. It is reported that most of the stockholders have expressed themselves favorably toward the plan and another meeting will be held in the near future to settle the matter.

### SKAT WINNERS

Those who took the prizes at the Skat tournament at the Elk club on Tuesday evening were as follows: L. M. Nash, first; J. R. Ragan, second; Dr. Boorman, third; J. F. Cooley, fourth; Walter Wood, fifth.

Marshfield Times: Mrs. Adolph Zech, who has been spending several months at Grand Rapids with her parents, Mr. and Mrs. Blaneboese, since the departure of her husband for the border with Company A, was in the city part of the week visiting friends. Before leaving Saturday she stated that First Sgt. Zech was planning to leave for San Antonio about December 1, and the balance of the winter there provided the regiment does not receive orders to move home before the first of the month.

### BOXING SHOW AT MARSHFIELD TOMORROW NIGHT

Friday evening, November 24, in the Armory hall, the Marshfield Athletic Association will open its second season of boxing with one of the most attractive cards yet offered, consisting of four bouts, a total of 30 rounds of the main attraction. The two popular Marshfield boxers, Tommy Krize and Kid Blacett, will be the main attraction. Both are reported to be better than ever at the game, which has aroused a lot of speculation as to how they will perform in the last time they performed in the arena, and this, coupled with the widespread interest in the card as a whole, has created prospects of an exceptionally large attendance. Gen. Duffy of Milwaukee is in the program as timekeeper. The boxers will weigh in at the Palm garden at 3 o'clock tomorrow afternoon.

The card follows:

Winthrop, County Clerk of Marshfield vs. Al. J. Campbell of St. Paul, 15 rounds, ten rounds.

Semi-winthrop: Jack Rose of Milwaukee vs. Kid Carter of Minneapolis, 115 pounds, eight rounds.

Two-hundred and thirty-five pounds: Marshfield vs. Battling Johnson of Eau Claire, 135 pounds, six rounds.

Preliminary: Young Josh of St. Paul vs. Carl Leonard of New Richmond, 128 pounds, six rounds.

Marshfield News.

### TRAVELING MEN HERE ON SATURDAY

Last Saturday the traveling men of Grand Rapids formed an organization in this city which is a branch of the U. C. T. and the name of which is the League of Wisconsin Council No. 575. The band turned out at noon and met the train from the south and as the weather was especially nice there was a large crowd on the streets, and with their flying occasion.

After the members from the south had arrived in the city a line was formed and this many more will be elected for the branch. The work was done by the branch from Marshfield, assisted by the state officers. The following officers of this city: Jr. Consular—O. R. Bonetis, Jr. Consular—John N. Vane, Past Consular—Geo. L. Warren, Sentinel—A. G. Mallette, Sec. Treas.—

### MARRIED FORTY YEARS

Mr. and Mrs. S. H. Smart celebrated their fortieth wedding anniversary at their home on Thursday of last week, on which occasion there were children and grandchildren in attendance to the number of fourteen. The time was spent in a very pleasant manner, and an excellent dinner was served. Mr. and Mrs. Smart are among the old residents of Grand Rapids, having been here for a quarter of a century.

### LIKE A LETTER FROM HOME

Alfred Omholt of Mukwonago in writing a year's subscription for the Tribune says: "We certainly enjoy reading the Tribune. It comes like a message from home. He also states that he is getting along nicely there and that they like the country, having been located there for several years now. Mr. Omholt was formerly a resident of Wood county and still has many friends here.

### ASYLUM MAKES MONEY

According to the annual report recently issued by the Wood county asylum for the insane, that institution has been making money ever since it was established, the total net earnings up to the present time being \$57,706.76. The net earnings for the last year are \$16,947.15.

In view of the facts as set forth in the report, we would suggest that several more asylums be built in the forest part of the county, as the forest land seems to be making any money these days are the insane asylums and paper mills.

The governing board of the asylum consists of Robert Connor, J. A. Brown and W. H. Bean, and Mr. and Mrs. Gilson are superintendent and matron of the institution.

### HAPPY FELCH HERE

"Happy" Felch, four years ago a member of the local baseball team, but for the past couple of years playing with the Chicago White Sox, has been in the city several days during the past week shaking hands with his numerous friends.

"Happy" was quite a phenomenon when he played with the local team, and it was this faculty that brought him into prominence among the big ones, and since he got into the big league, he has held up the reputation that he made in this vicinity.

### PLACES LARGE ORDERS

The Soo line has recently placed orders for new equipment involving an expenditure of \$1,250,000, according to an announcement made by President Edmund Pennington. The order includes 800 box cars and 200 automobile cars. The new cars will be built on the most modern lines and will be constructed of wood with steel framework, it is said. The cars are to be delivered next spring.

### ANOTHER ORNAMENTAL LIGHT

The electric company has placed an ornamental street light on the corner near the Wood County Bank. This is a much better looking proposition than the other ones that have been burning in that locality, but it looks as if it would cost considerable to install when compared with the other light.

### RECEPTION FOR PASTOR

A reception will be held at the Methodist church parlors on Friday evening, November 24th, for the new pastor and his wife, Rev. and Mrs. C. C. Becker. The congregation and friends of the church are invited to be present at the meeting.

### RAISE NOT WELCOMED

The raise in price to 8 cents a quart by the local milk trust is not being received with the welcome that might be expected. Housekeepers and farmers say that it is a pure case of steal, and not justified by the cost of production.

### ELECTION RECOUNT RESULTS IN A TIE

Owing to the fact that when all the returns were in the vote on register of deeds was very close, with the republican nominee leading with only a few, John Hoffman, the democratic nominee, demanded a recount, and the game was conducted at the court house last week, finishing up Saturday afternoon.

Those having charge of the recount were E. L. Bourke, W. T. Nobles and Frank Calkins, and the two contestants were represented by their attorneys, who watched every ballot on which there was any question as to the intent of the voter, and discussed the matter until it was settled to the satisfaction of all concerned. Mr. Hoffman was represented by Attorneys W. E. Wheelan, A. J. Crowns and H. E. Pich, and Mr. Ebbe was represented by Attorneys T. W. Brazau and Charles E. Friere.

When it was all over it was found that the two candidates had received exactly the same number of votes and it was decided to settle the matter by flipping a coin. Frank Wagner was called in and given the dollar and instructed to spin the same, which he did, and the democratic candidate won the election. The republican "tails" and it landed tails up, and the result is that we will have a republican register of deeds during the next two years.

This was certainly the closest election that has occurred in this county in recent years, and there were a number of ballots that required considerable careful consideration before they were told just what the voter intended to do. However, it was admitted by all that the utmost effort was made to be perfectly square with both of the candidates, and when it was all over, they were all perfectly satisfied with the result.

### THE OFFICIAL FIGURES

The official canvass of the ballots cast in this state at the recent election has been completed and the majorities and pluralities of the successful candidates were found to be as follows:

President—Hughes, 274,478.  
U. S. Senator—La Follette, 116,658.  
Governor—Phillips, 68,624.  
Lieut. Gov.—Dunn, 80,654.  
Secretary of State—Hall, 99,537.  
Attorney General—Owen, 68,894.  
State Treasurer—Johnson, 33,373.

## THIRD REGIMENT IS ORDERED HOME

ONE SECTION OF WISCONSIN TROOPS ON BORDER TO BE MUSTERED OUT.

1,450 MEN ARE AFFECTED

Third Regiment Comprises Companies From West Central Part of the State—Have Been in Texas Four Months.

San Antonio, Texas.—Five National guard regiments have been ordered home from border duty, including the Third Wisconsin Infantry. The five regiments total 6,000. The Third Wisconsin regiment comprises about 1,450 men.

The Third Wisconsin Infantry consists of two companies from La Crosse and one from each of the following towns: Sparta, Tomah, Eau Claire, Superior, Menomonie, Hudson, Neillsville, Portage, Wausau and Manitowish. The companies are commanded by Capt. J. H. Richards of Sparta, and Capt. J. H. Richards of Sparta, and Capt. J. H. Richards of Sparta.

When the members of the Third Wisconsin regiment received word here that an order had been issued from the war department mustering them out, a busy scene went up. The company's band was rounded up and it played many stirring airs.

The Third regiment boys will probably be sent to Fort Sheridan, Ill., and be mustered out there. From Fort Sheridan they will be given transportation to their respective homes. The regiment has been in Texas for more than four months.

## DECLINE IN INFANT DEATHS

Summer Statistics of State Show Higher General Death Rate For Season Past.

Madison.—Although the infant death rate is usually higher during the hot summer months, state records for July, August and September, 1916, show a decline, a distinct decline from the average of nine years.

With the exception of a slight variation each year, which cannot be satisfactorily explained, there is a marked and steady decline in the number of deaths among children under the year of age during the hot months.

This is due almost entirely, declares the state board, to better knowledge of how to feed and care for young children.

Total deaths for the quarter were 6,552. This is 1,21 more than in the same months last year.

Vote New School Bonds.

Menasha.—Another bond issue for \$15,000 has been voted on favorably here, to be used for school building purposes. This will be added to an issue of \$30,000, made a year ago for the same purpose which was not sufficient because of the high cost of labor and materials for the building of an addition to the local high school.

Missing Man Found Dead.

Stevens Point.—The body of Joseph Frank, 74 years old, who disappeared from his home a few days ago, was found in a pool on the Blechhorst stock farm, northeast of this city. Frank wandered away from his home in the night and no trace of him could be discovered.

Reassessment Lowers Taxes.

Stevens Point.—The treasurer of the town of Dewey conducted by state tax commission has resulted in a lowering of the valuation to \$437,559 compared with a total of \$491,927 fixed by the local assessor and \$657,555 fixed by the incomes assessor.

Kenosha Pioneer Dies.

Kenosha.—Mrs. Veronice Ritter, widow of the late Joseph Ritter and a resident of Kenosha for more than 45 years, died here at the age of 76 years. She had been prominent in religious and charitable work in the city for many years.

Wounded Hunter Crawls 15 Miles.

Ashtland.—Mistaken for a deer and shot through the leg, Joseph Stauber of Cayuga, Wis., crawled fifteen miles on his hands and knees for medical assistance. Stauber was trailing a deer when he was shot.

Captain Dies on Ship.

Algonquin.—Capt. A. R. Robinson of the steamer William J. Olcott suffered a stroke of apoplexy in the ship's bathroom and died before medical aid could reach him.

County Board Organizes.

Stevens Point.—At the annual meeting of the county board, John J. Park of this city was elected chairman. John Overmeyer of New Hope, D. W. Sawyer of Delmont was chosen vice chairman.

Scarlet Fever Spreads.

Richland Center.—Reports of twenty cases of scarlet fever at Richland Center have caused the closing of the public schools and forbidding meetings.

Plan Christmas Tree.

Beaver Dam.—A committee, appointed by the Catholic Ladies' Aid society, met here to discuss plans toward giving a community Christmas tree for the less fortunate children of Beaver Dam. The same was done last year.

Potatoes Being Held?

Norwalk.—A drop in the price of potatoes before next spring is predicted here. Dealers say farmers are holding their supply in the hope of obtaining fabulous prices.

## DEMOCRATS SPEND \$9,068

Report Filed at Madison Shows Burt Williams Paid Out \$2,600—Gov. Philip Spent \$4,892.

Madison.—That the Democratic state central committee received \$11,447.99 for its campaign fund in the recent contest, spent \$9,068.00 and still owes \$2,379.99, are facts shown in the final account filed in the office of Secretary of State Donald. According to the statement, the committee is \$1,884.46 to the good.

M. K. Reilly, Democratic candidate for congress in the Sixth district, spent \$2,170.99. Other Democratic candidates who were not successful have filed statements showing expenditures as follows: Burt Williams, for governor, \$2,600.00; T. J. Ryan, for attorney general, \$345.00; W. E. Wolfe, for United States senator, \$1,943.72; M. E. Burke, for congress from the Second district, \$2,356.00; John Cudahy, for lieutenant governor, \$843.43.

Successful republican candidates filed statements showing expenditures as follows: E. L. Philipp, for governor, \$4,892.49; W. J. Cary, for congress, Fourth district, \$1,159.52; James A. Fear, for congress, Tenth district, \$582.47; John J. Egan, for congress, Seventh district, \$627.92; J. H. Davidson, for congress, Sixth district, \$1,929.81; E. E. Browne, for congress, Eighth district, \$1,907.55; D. G. Glasco, for congress, Ninth district, \$351.36; W. H. Stafford, for congress, Fifth district, \$457.68; Edward Vogens, for congress, Second district, \$655.72; H. A. Roelke, for state senator, \$353.95.

## MEDICAL TROOPS TAKE FIELD

Sanitation Corps of Wisconsin Brigade Goes to Leon Springs for Training Course.

Fort Sam Houston, San Antonio, Tex.—Practically all Wisconsin sanitary and medical troops completed their march to Leon Springs, where for ten days or two weeks they will study field problems of caring for sick and wounded. In order to have "rounds" over on the battlefield, the first battalion of the First regiment, commanded by Maj. Irving Fish, Milwaukee, was taken along.

Lieut. Graebner, Milwaukee, will remain with the first regiment at the post with Lieut. William N. Moore, Appleton, Second regiment, and Lieut. Jesse H. Bryant, Wausau, Third regiment. These officers will take care of the medical needs of each regiment, but will be relieved after four days by officers at Leon Springs so that they may get the benefit of the training under Lieut. Col. E. L. Munson, division surgeon and chief sanitary inspector of the southern department.

An attorney serving as orderly to a judge is the unique situation with Col. Randolph Richards, Third regiment, Sparta, and his orderly, Private A. Heine, Virgon, on the battlefield of the University of Wisconsin in 1908, law 1912.

Thirty-one years in the Wisconsin National guard is the record of Melvin Frank Brown, Company D, Third regiment, Madison.

## 211 TEACHERS GET PENSION

Receive Annual Average of \$362.76. Total Amount of Cash Resources in Fund is \$430,413.

Madison.—There are 211 teachers in the state receiving annuities from the teachers' insurance and retirement fund, according to the report which has just been compiled by R. E. Loveless, secretary of the board. These receive an annual average pension of \$362.76 a year. Since the law was enacted 221 certificates have been issued. Three women and one man have died and four women and two men are returned to teaching.

The total amount of cash resources in the fund is \$430,413.07 of which \$411,413.07 is invested in bonds earning an annual interest of 4.56 per cent. During the past year the receipts to the fund have been \$167,447.66. There has been paid out for administration expenses during the year \$5,859.10 and annuities, \$72,734.66. The state contributes 10 cents for each child of school age to the fund.

## W. F. Wolfe Operated On.

La Crosse.—William F. Wolfe, recently elected to the senate, has been operated on by Dr. J. H. Richards of Sparta, Wis., recovering at St. Francis hospital from an operation for appendicitis. Mr. Wolfe was taken ill at a Chicago hotel, where he and Mrs. Wolfe had gone for a brief trip to rest after the campaign. He was rushed back to the city suffering intense pain and taken at once to the operating table.

## Celebrate Golden Wedding.

Cumberland.—Nels H. Peterson and wife recently celebrated the golden wedding anniversary at the home of their son, Herman Peterson. Mr. and Mrs. Peterson were married in 1866, at Samsell, Denmark, and have spent most of their married life at Cumberland.

## Hunter Wounds Farmer.

Marquette.—Irma Raeta, living on a farm near Goose lake, sustained severe wounds in his left leg, when a charge of buckshot was fired into it from a hunter who mistook him for a deer.

## Changes Dates for Show.

Wausau.—The Marathon County Bankers' association has changed the dates of its annual grain and dairy product show from Dec. 7 and 8 to Friday and Saturday, Dec. 15 and 16.

## Plan Big Road Fund.

Monroe.—Green county good roads enthusiasts are urging the spending of \$1,000,000 for road improvements during the coming four years, and the matter was submitted to the county supervisors.

## Edgerton Officer Promoted.

Edgerton.—Clarence O. Jensen, son of Andrew Jensen of Edgerton, has been appointed sergeant in the quartermaster corps of the Seventh division.

## Pioneer Lake Captain Dies.

Kenosha.—Capt. John Symmonds, 82 years old, the last of the pioneer lake captains who built up the commerce on the great lakes, died at his home in this city, following a stroke of paralysis. He had been in the lake trade for more than sixty years.

Shoots Self Rather Than Bathe.

Stout.—Because his daughter insisted he take a bath, Michael, aged 74, weighing 225 pounds, went to the bathroom and shot himself.

## WOLFE IS NAMED TO SUCCEED AYLRARD

SENATOR HUSTING SENDS IN NAME TO PRESIDENT FOR U. S. DIST. ATTORNEY.

PROMINENT IN POLITICS

Was Candidate for United States Senator on Democratic Ticket at Recent Election—Practiced Law Since 1894.

Madison.—William F. Wolfe, unsuccessful candidate for the United States senate on the democratic ticket at the recent election, was nominated by Senator Paul O. Husting to succeed the late John A. Aylward as district attorney for the western district of Wisconsin. Senator Husting transmitted his recommendation to President Wilson from his home at Mayville.

Since 1894 Mr. Wolfe has been a lawyer in La Crosse. His original home was on a farm near Appleton, where he was born on Aug. 30, 1858. His father was a prominent pioneer of that section, serving on the county board many years and in the state legislature of 1895.

Mr. Wolfe's educational career started at Appleton, where he was graduated from the Ryan High school, and was completed at the University of Wisconsin, where he took both the academic and law courses. He completed the first in little more than three years, but graduated with the class of 1891.

After entering a law partnership at La Crosse with Charles B. Miller, Mr. Wolfe became more active in politics. In 1902 he was one of the managers of Wendell A. Anderson's campaign for the democratic nomination for governor. When Mayor David S. Rose was nominated, he took the stamp for him and worked throughout the campaign. He has been a leader in state democratic ranks ever since.

## RUWEN OWEN WILL RESIGN

Recently Re-Elected Attorney General to Practice Law at Madison Is Report.

Madison.—Much surprise was occasioned in capital city circles by the announcement that Attorney General Walter C. Owen, re-elected to office Nov. 7, probably would resign on Jan. 1 to engage in the practice of law. It is stated that he will fill a vacancy in the firm of Richmond, Jackson & Swanson, the latter having recently retired to become assistant counsel of the North-Western road in Milwaukee.

Friends of Mr. Owen are urging the appointment of Walter Owen, present deputy attorney general, but as Gov. Philipp is absent on a hunting trip, it is not known what action he will take in the matter of filling the vacancy.

It is understood that Mr. Owen will tender his resignation to Gov. Philipp personally and recommend Mr. Drew as his successor.

This announcement has caused an upheaval of no small dimension in state circles here. It will be possible for him to continue as attorney general and to be in practice at the same time. There is nothing in the constitution that prohibits such action and other holders of the office have done so.

Since he has been in office Mr. Owen has devoted all his time to the official duties.

## To Cut 1,000,000 Feet.

Stevens Point.—Peter Kornfeld of Unifly has taken a contract to cut about 1,000,000 feet of logs for the John Week Lumber company of this city this winter. The Week company has begun shipping about 1,000 cords of tan bark from the Mosinee district.

## Charged With Killing Dog.

Stevens Point.—Charged with shooting a dog belonging to August Witta of Hull, while hunting recently, Anton Cyran, 29 years old, has been bound over to the district court under a \$200 bond. The charge against him is cruelty to animals.

## To Build \$5,000 Bridge.

Ashtland.—The county board awarded the contract for the construction of a new steel bridge over White river to Minneapolis firm, their bid being \$5,000.

## After Dinner Pail Assault.

Ashtland.—Ambrose Starkman swore out a warrant for the arrest of Michael Misteck, who he alleges, used a dinner pail to disfigure his features to the extent of two discolored optics.

## Many Are Given Jobs.

Green Day.—Employment was found for 237 women and 431 men by the free employment bureau of the Brown county woman's building in a year, according to a report submitted to the trustees.

## Says Clerks Deserve Fees.

Madison.—Attorney General Owen, in an opinion to District Attorney James H. Bambo, says that a county clerk is entitled to the fees taken for naturalization of citizens.

## Superior Farmer Killed.

Superior.—Peter Nelson, a well known farmer, formerly of Superior, was run down and killed by a North Pacific passenger train at Carlton. He was temporarily acting as fire guard for the road.

## Enforce Apprentice Law.

Wausau.—Edward Somerfeld was fined \$5 and costs in municipal court for refusing to require or permit his son, Edward, 16 years old, to attend the city industrial school.

Kills Golden Eagle.

Janesville.—A large golden eagle was shot and killed in a chicken yard by Jerry Sullivan. About a year ago Sullivan killed a bird of the same variety in his chicken yard.

Want Ski Slides.

Superior.—Six ski slides, each twenty feet in height will be erected in six parts of the city at municipal expense, if plans of Mayor J. S. Konkil are adopted.

## THE END OF THE BENCH

BEG PARDON BUT YOU'LL HAVE TO GET OFF HAVE SOME FRIENDS WHO WISH TO SIT HERE

## WILL FIGHT RAIL LAW REPLY ON BLACKLIST

OFFICIAL SAYS RAILROADS WON'T SHIFT RESPONSIBILITY. GREAT BRITAIN RESENTS SUSPICION AS TO MOTIVE.

Washington, Nov. 16.—The British reply to the latest American protest against the trade blacklist, made public on Wednesday by the state department, denies that rights of neutral traders under international law have been ruthlessly canceled, and defines the blacklist measures as a municipal regulation plainly concerning only the British government and British citizens, contends that it is designed to shorten the war and scorns the suspicion that Britain is using the law as a measure to take away neutrals' trade.

The note fails to meet the American demand that the names of American firms be stricken from the blacklist, but attempts to convince the state department that the British position is just and founded on law. It leaves open the door for further negotiation, which is expected to follow.

A part which attracted much official notice dealt with the subject of peace, based on the theory that one American contention had been that there exists no military necessity for the blacklist; that, nothing which happens in distant neutral countries can influence the result of the great conflict.

In its argument the note points out that German business houses throughout the world have furnished the cause of Germany in the war.

The note apparently admits Britain has altered the position previously held with the United States, that domestic and international law is the test of enemy character, and argues that in this war nationals or belligerents domiciled far from home may render great aid and comfort, admitting that these are sought to be reached by the blacklist measure.

Attention is called to instructions to British merchants, issued by Lord Russell in 1862 regarding trade with the Bahamas during the Civil war, advising that the "true remedy" was to refrain from this trade.

## MEXICANS FREE U. S. SCOUT

Benjamin Brahan Declares He Was Threatened With Death for Aid in General Pershing.

El Paso, Tex., Nov. 17.—After being in the Juarez jail since November 7, during which time he expected to be shot as a spy, Benjamin Brahan was released on Wednesday as the military headquarters in Juarez and the American side of the river.

Brahan said he knew of no reason why he was arrested other than that he was a scout for General Pershing in Mexico.

He said: "I was not told officially that I was to be shot, but I was given to understand I would be executed. After Andreas Garcia took an interest in my case I was treated much better."

## ORDER TROOPS FROM BORDER

Indiana and Wisconsin Regiments Among Those Withdrawn From Service Along Rio Grande.

Washington, Nov. 15.—Five National guard regiments were ordered home from the Mexican border on Thursday. They are the First regiment of South Carolina, Seventh Wisconsin Third Indiana, Third Wisconsin and Third Minnesota.

In a statement announcing the order the war department said it was in confirmation of the policy "announced some time ago gradually to withdraw National Guard regiments from the border as conditions permit, and, in accordance with the recommendations of General Funston, these regiments have been ordered home."

## Fire Destroys Railway Station.

San Bernardino, Cal., Nov. 20.—Fire here destroyed the big Santa Fe station and several of the car shops, causing loss estimated at \$225,000. Twelve passenger coaches in course of construction were burned.

## War to Last Another Year.

New York, Nov. 20.—The war in Europe will last at least another year, according to Frederick Palmer, war correspondent, who arrived here on the Holland-American liner Nieuwe Amsterdam.

## King Attends Funeral.

Athens, Nov. 17.—King Constantine attended the state funeral of Colonel Brangoulis, an aid de camp of the king. The colonel was killed in the United States by coming in contact with an electric wire.

## Russ Fought Situation Acute.

Petrograd, Nov. 17.—The food situation here has become so acute in Russia that the budget committee has recommended to the duma that the government assume complete control and fix prices.

## Denies Dumba's Death.

Vienna, Nov. 16.—Official denial was made here on Tuesday afternoon of reports and half-miles abroad that Dr. Constantin Dumba, former Austrian ambassador to the United States, was dead.

## Japanese Submarine Destroyed.

Kobe, Japan, Nov. 16.—It was announced here two seamen were killed and six officers and eighty sailors were wounded by an explosion which destroyed the Japanese submarine No. 4.

## THIRD REGIMENT IS ORDERED HOME

ONE SECTION OF WISCONSIN TROOPS ON BORDER TO BE MUSTERED OUT.

### 1,450 MEN ARE AFFECTED

Third Regiment Comprises Companies From West Central Part of the State—Have Been in Texas Four Months.

San Antonio, Texas, Nov. 18.—Five National guard regiments have been ordered home from border duty, including the Third Wisconsin infantry. The five regiments total 6,000; the Third Wisconsin regiment comprises about 1,450 men.

The Third Wisconsin infantry consists of two companies from La Crosse and one from each of the following towns: Sparta, Tomah, Eau Claire, Superior, Menomonie, Hudson, Neillsville, Portage, Wausau and Mauston. The companies are commanded by Capt. A. J. Richards, of Sparta, is commander of the regiment; John W. Hume, of Neillsville, lieutenant colonel; and the majors are John Turner of Mauston, William V. Burton of Hudson and Marshall Collins of Eau Claire. The chaplain is George R. Landwehr of La Crosse.

When the members of the Third Wisconsin regiment received word here that an order had been issued from the war department ordering them out, a busy career went up. The company's band was rounded up and it played many stirring airs.

The Third Wisconsin boys will probably be sent to Fort Sheridan, Ill., and be mustered out there. From Fort Sheridan they will be given transportation to their respective homes. The regiment has been in Texas for more than four months.

### DECLINE IN INFANT DEATHS

Summer Statistics of State Show Higher General Death Rate For Season Past.

Madison.—Although the infant death rate is usually higher during the hot summer months, state records for July, August and September, 1915, show 1,096 deaths, a distinct decline from the average of nine years.

With the exception of a slight variation each year, which cannot be satisfactorily explained, there is a marked and steady decline in the number of deaths among children under one year of age during the hot months. This is shown clearly, declares the state board, to better knowledge of how to feed and care for young children.

Total deaths for the quarter were 6,652. This is 1,211 more than in the same months last year.

### Vote New School Bonds.

Menasha.—Another bond issue for \$15,000 has been voted on favorably here, to be used for school building here. This will be added to an issue of \$30,000, made a year ago for the same purpose, which was not sufficient because of the high cost of labor and materials for the building of an addition to the local high school.

### Missing Man Found Dead.

Stevens Point.—The body of Joseph Frank, 74 years old, who disappeared from his home a few days ago, was found in a pool on the Richbort stock farm, northeast of this city. Frank wandered away from his home in the night and no trace of him could be discovered.

### Reassessment Lowers Taxes.

Stevens Point.—The reassessment of the town of Dewey conducted by the state tax commission has resulted in a lowering of the valuation to \$437,559 compared with a total of \$491,327 fixed by the local assessor and \$557,555 fixed by the income assessor.

### Kenosha Pioneer Dies.

Kenosha.—Mrs. Veronica Ritter, widow of the late Joseph Ritter and a resident of Kenosha for more than 45 years, died here at the age of 75 years. She had been prominent in religious and charitable work in the city for many years.

### Wounded Hunter Crawls 15 Miles.

Ashland.—Mistaken for a deer and shot through the leg, Joseph Stauber of Cayuga, Wis., crawled fifteen miles on his hands and knees for medical assistance. Stauber was trailing a deer when he was shot.

### Captain Dies on Ship.

Algoma.—Capt. A. R. Robinson, of the steamer William J. Olcott suffered a stroke of apoplexy in the ship's bathroom and died before medical aid could reach him.

### County Board Organizes.

Stevens Point.—At the annual meeting of the county board Attorney C. L. Park of this city was elected chairman over former chairman Benjamin Halverson of New Hope. D. W. Sawyer of Belvaunt was chosen vice-chairman.

### Scarlet Fever Spreads.

Richland Center.—Reports of twenty cases of scarlet fever at Richland Center have caused the closing of the public schools and forbidding meetings.

### Plan Christmas Tree.

Beaver Dam.—A committee, appointed by the Catholic ladies' aid society, met here to discuss plans toward giving a community Christmas tree for the less fortunate children of Beaver Dam, the same as was done last year.

### Potatoes Being Held?

Neenah.—A drop in the price of potatoes before next spring is predicted here. Dealers say farmers are holding their supply in the hope of obtaining fabulous prices.

### Fire Destroys Farm Buildings.

Stevens Point.—Fire on John Woloski farm near Mehan station destroyed three small barns, five horses, eight or ten tons of hay and some fodder and farm machinery. The loss about \$2,000.

### To Present "Messiah."

Ashland.—K. E. Horst, teacher of violin here, will organize an orchestra of twelve pieces and a chorus of 100 voices and soloists to participate in "The Messiah," to be given here soon.

## DEMOCRATS SPEND \$9,068

Report Filed at Madison Shows Burt Williams Paid Out \$2,600—Gov. Philip Spent \$4,992.

Madison.—That the Democratic state central committee received \$17,447.99 for its campaign fund in the recent contest, spent \$9,068.60 and still owes \$844.73, are facts shown in the final account filed in the office of Secretary of State Donald. According to the statement, the committee is \$1,884.46 to the good.

M. K. Reilly, Democratic candidate for congress in the Sixth district, spent \$2,417.09. Other Democratic candidates who were not successful have filed statements showing expenditures as follows: Burt Williams, for governor, \$2,601.75; T. H. Ryan, for attorney general, \$3,054.72; James A. Prewer, for congress, Tenth district, \$582.47; John J. Esch, for congress, Seventh district, \$627.02; J. H. Davidson, for congress, Sixth district, \$1,929.41; E. E. Browne, for congress, Eighth district, \$1,049.53; D. E. Johnson, for congress, Ninth district, \$261.50; W. H. Stanford, for congress, Fifth district, \$457.68; Edward Voight, for congress, Second district, \$685.72; H. E. Rosche, for state senator, \$332.95.

Successful republican candidates filed statements showing expenditures as follows: E. L. Philipp, for governor, \$1,592.05; W. J. Cary, for congress, Sixth district, \$2,175.72; James A. Prewer, for congress, Tenth district, \$582.47; John J. Esch, for congress, Seventh district, \$627.02; J. H. Davidson, for congress, Sixth district, \$1,929.41; E. E. Browne, for congress, Eighth district, \$1,049.53; D. E. Johnson, for congress, Ninth district, \$261.50; W. H. Stanford, for congress, Fifth district, \$457.68; Edward Voight, for congress, Second district, \$685.72; H. E. Rosche, for state senator, \$332.95.

### MEDICAL TROOPS TAKE FIELD

Sanitation Corps of Wisconsin Brigade Goes to Leon Springs for Training Course.

Port San Antonio, Texas, Nov. 18.—Practically all Wisconsin sanitation and medical troops completed their march to Leon Springs, where for ten days or two weeks they will study field problems of caring for sick and wounded. In order to have "wounded" men on the battlefields, the First battalion of the First regiment, commanded by Maj. Irving Fish, Milwaukee, is taking alone.

Lieut. Grunberger, Milwaukee, will remain with the First regiment at the post as will Lieut. William N. Moore, Appleton. Second regiment, and Lieut. Jesse R. Bryant, Wausau, Third regiment. These officers will take charge of the medical needs of each regiment, but will be relieved after four days by officers at Leon Springs so that they may get the benefit of the training under Lieut. Col. E. L. Manson, division surgeon and chief sanitary inspector of the southern department.

An attorney serving as orderly to a judge is the unique situation with Col. Randolph Richards, Third regiment, Sparta, and his orderly, Private A. H. Hearn, a Viroqua attorney, graduate of the University of Wisconsin in 1908, law 1912.

Thirty-one years in the Wisconsin National guard is the record of Melchior Frank Brown, Company D, Third regiment, Mauston.

### 211 TEACHERS GET PENSION

Receive Annual Average of \$362.76. Total Amount of Cash Resources in Fund Is \$430,413.

Madison.—There are 211 teachers in the state receiving annuities from the teachers' insurance and retirement fund, according to the report which has just been compiled by R. E. Loveland, secretary of the board. These receive an annual average pension of \$362.76 a year. Since the law was enacted, 211 certificates have been issued. Three women and one man have died and four women and two men have returned to teaching.

The total amount of cash resources in the fund is \$430,413.07 of which \$411,413.07 is invested in bonds earning an annual interest of 4.51 per cent. During the past year the receipts to the fund were \$1,677,447.56. There has been paid out for administration expenses during the year \$5,859.10 and annuities, \$72,734.56. The state contributes 10 cents for each child of school age to the fund.

### W. F. Wolfe Operated On.

La Crosse.—William F. Wolfe, recently defeated as the Democratic candidate for United States senator, is recovering at St. Joseph's hospital from an operation for appendicitis. Mr. Wolfe was taken ill at a Chicago hotel, where he and Mrs. Wolfe had gone for a brief trip to rest after the campaign. He was rushed back to the city suffering intense pain and taken at once to the operating table.

### Celebrate Golden Wedding.

Cumberland.—Nels H. Peterson and wife recently celebrated their golden wedding anniversary at the home of their son, Herman Peterson. Mr. and Mrs. Peterson were married in 1866, at Sampson, Denmark, and have spent most of their married life at Cumberland.

### Hunter Wounds Farmer.

Marinette.—Irma Racta, living on a farm near Goose lake, sustained severe wounds in his left leg, when a charge of buckshot was fired into it from a hunter who mistook him for a deer.

### Changes Dates for Show.

Wausau.—The Marathon County Bankers' association has changed the dates of its annual grain and dairy product show from Dec. 7 and 8 to Friday and Saturday, Dec. 15 and 16.

### Plan Big Road Fund.

Monroe.—Green county good roads enthusiasts are urging the spending of \$1,000,000 for road improvements during the coming four years, and the matter was submitted to the county supervisors.

### Edgerton Officer Promoted.

Edgerton.—Clarence O. Jensen, son of Andrew Jensen of Edgerton, has been appointed sergeant in the quartermaster corps of the Seventh division.

### Pioneer Lake Captain Dies.

Kenosha.—Capt. Robert Symmonds, 82 years old, the last of the pioneer lake captains who built up the commerce on the great lakes, died at his home in this city, following a stroke of paralysis. He had been in the lake trade for more than sixty years.

### Shoots Self Rather Than Bathe.

Bellevue.—Because his daughter neglected to bathe, Michel, aged 74, weighing 225 pounds, went to the bathroom and shot himself.

## WOLFE IS NAMED TO SUCCEED AYLWARD

SENATOR HUSTING SENDS IN NAME TO PRESIDENT FOR U. S. DIST. ATTORNEY.

### PROMINENT IN POLITICS

Was Candidate for United States Senator on Democratic Ticket at Recent Election—Practiced Law Since 1894.

Milwaukee.—William F. Wolfe, unsuccessful candidate for the United States senate on the democratic ticket at the recent election, was nominated by Senator Paul O. Husting to succeed the late John A. Aylward as district attorney for the western district of Wisconsin. Senator Husting transmitted his recommendation to President Wilson from his home at Mayville.

Since 1894 Mr. Wolfe has been a lawyer in La Crosse. His original home was on a farm near Appleton, where he was born on Aug. 30, 1868. His father was a prominent pioneer of that section, serving on the county board many years and in the state legislature of 1895.

Mr. Wolfe's educational career started at Appleton, where he was graduated from the Ryan High School, and was completed at the University of Wisconsin, where he took both the academic and law courses. He completed the first in little more than three years, but graduated with the class of 1891.

After entering a law partnership at La Crosse with Charles B. Miller, Mr. Wolfe became more active in politics. In 1902 he was one of the managers of the Wendell A. Anderson's campaign for the democratic nomination for governor. When Mayor David S. Rose was nominated, he took the stump for him and worked throughout the campaign. He has been a leader in state democratic ranks ever since.

### RUMOR OWEN WILL RESIGN

Recently Re-Elected Attorney General to Practice Law at Madison Is Report.

Madison.—Much surprise was occasioned in capital city circles by the announcement that Attorney General Walter C. Owen, re-elected to office Nov. 7, probably would resign on Jan. 1 to engage in the practice of law. It is stated that he will fill a vacancy in the firm of Richmond, Jackson & Swanson, the latter having recently retired to become assistant counsel of the North-Western road in Milwaukee.

Friends of Mr. Owen are urging the appointment of Walter Drew, present deputy attorney general, but as Gov. Philipp is absent on a hunting trip, it is not known what action he will take in the matter of filling the vacancy.

It is understood that Mr. Owen will tender his resignation to Gov. Philipp personally and recommend Mr. Drew as his successor.

This announcement has caused an upheaval of no small dimension in state circles here. It will be possible for him to continue as attorney general and to be in private practice at the same time. There is nothing to the constitution that prohibits such action and other holders of the office have done so.

Since he has been in office Mr. Owen has devoted all his time to the official duties.

### To Cut 1,000,000 Feet.

Stevens Point.—Peter Kornfeld of Unity has taken a contract to cut about 1,000,000 feet of logs for the John Week Lumber company of this city this winter. He will also peel bark in the spring. The Week company has begun shipping about 1,000 cords of tan bark from the Mosinee district.

### Charged With Killing Dog.

Stevens Point.—Charged with shooting a dog belonging to August Witta of Hull, while hunting recently, Anton Cyran, 19 years old, has been bound over to the circuit court under a \$200 bond. The charge against him is cruelty to animals.

### To Build \$5,000 Bridge.

Ashland.—The county board awarded the contract for the construction of a new steel bridge over White river to a Minneapolis firm, their bid being \$5,000.

### After Dinner Pail Assault.

Ashland.—Ambros Starkman swore out a warrant for the arrest of Michael Misteckan who, he alleges, used a dinner pail to disfigure his features to the extent of two discolored optics.

### Many Are Given Jobs.

Green Bay.—Employment was found for 92 women and 431 men by the state employment bureau of the Brown county woman's building in a year, according to a report submitted to the trustees.

### Says Clerks Deserve Fees.

Madison.—Attorney General Owen, in an opinion to District Attorney James Hill, Baraboo, says that a county clerk is entitled to the fees taken in for naturalization of citizens.

### Superior Farmer Killed.

Superior.—Peter Nelson, a well known farmer, formerly of Superior, was run down and killed by a North Pacific passenger train at Carlton. He was temporarily acting as fire guard for the road.

### Enforce Apprentice Law.

Wausau.—Edward Somerfeld was fined \$5 and costs in municipal court for refusing to require or permit his son, Edward, 16 years old, to attend the city industrial school.

### Kills Golden Eagle.

Janesville.—A large golden eagle was shot and killed in a chicken yard by a half mile east of the city by Jerry Sullivan. About a year ago Sullivan killed a bird of the same variety in his chicken yard.

### Want Ski Slides.

Superior.—Six ski slides, each twenty feet in height will be erected in six parks of the city at municipal expense, if plans of Mayor J. S. Konkel are adopted.

## THE END OF THE BENCH

## WILL FIGHT RAIL LAW REPLY ON BLACKLIST

OFFICIAL SAYS RAILROADS WON'T SHIFT RESPONSIBILITY. GREAT BRITAIN RESENTS SUSPICION AS TO MOTIVE.

Kansas City Man to Aid U. S. in Battle Against Carriers on Adamson Law.

Chicago, Nov. 18.—Every railroad in the country will fight the Adamson eight-hour law and await an interpretation of its meaning. According to a prominent Chicago railroad man, "The official made this statement following the filing of new suits attacking the constitutionality of the law and asking injunctions to prevent its enforcement. The Chicago & Alton railroad filed a suit in Chicago on Wednesday, while the Pennsylvania railroad began similar action in New York.

Washington, Nov. 17.—Suits by railroads attacking the constitutionality of the eight-hour railroad law were begun in many parts of the country and the department of justice laid plans to defend them.

The department on Wednesday issued this statement: "A large number of suits attacking the constitutionality of the Adamson law have been instituted in various parts of the United States. The department of justice will take direct charge of these cases, and Frank Hagerman of Kansas City, Mo., has been retained to assist in their preparation and trial."

Prompt and final decision by the supreme court of constitutionality of the law is possible under federal court practice, it was stated by lawyers familiar with federal procedure.

### DARIO RESTA WINS RACE

Smashes All Records for Event and Also for Santa Monica Course—Cooper Finishes Second.

Santa Monica, Cal., Nov. 18.—Smashing to fragments all previous records for the Vanderbilt cup race and also for the Santa Monica course, Dario Resta, an Italian, won the Vanderbilt cup race, the eleventh annual event in 3:22.48, an average of 80.00 miles an hour. The previous time for the 204-mile contest was set on the same course in 1914 by Ralph DePalma, who negotiated the distance at an average of 75.40 miles an hour. Alfken and his Peugeot went out in the twentieth lap with a broken valve. Earl Cooper, the American who stayed at second or third throughout the race, finished second. William Weightman, a millionaire Chicago sportsman, drove his Duesenberg to third place.

### MEXICANS FREE U. S. SCOUT

Benjamin Brahan Declares He Was Threatened With Death for Aid in General Pershing.

El Paso, Tex., Nov. 17.—After being in the Juarez jail since November 7, during which time he expected to be shot as a Villa spy, Benjamin Brahan was released on Wednesday at the military headquarters in Juarez and came to the American side of the river.

Brahan said he knew of no reason why he was arrested other than that he was a scout for General Pershing in Mexico.

He said: "I was not told officially that I was to be shot, but I was given to understand I would be executed. After Andreas Garcia took an interest in my case I was treated much better."

### Robbers Take \$6,700 From Bank.

Vasconburg, Colo., Nov. 18.—Gaining entrance through an abandoned chimney hole in the ceiling, covered over with lath and plaster for some time, robbers broke into the First National bank here, dynamited the safe and got away with \$6,700, mostly in silver.

### 33 Ships Sunk Without Notice.

London, Nov. 18.—Thirty-three vessels have been sunk without warning by submarines from May 15 to November 8, according to an admiralty announcement, which adds that as a result of this 340 lives were lost.

### War to Last Another Year.

New York, Nov. 20.—The war in Europe will last at least another year, according to Frederick Palmer, war correspondent, who arrived here on the Holland-American liner Nieuwe Amsterdam.

### King Attends Funeral.

Athens, Nov. 17.—King Constantine attended the state funeral of Colonel Erangoudis, an aid de camp of the king. The colonel was killed in the United States by coming in contact with an electric wire.

### Russ Foe Situation Acute.

Petrograd, Nov. 17.—The food situation has become so acute in Russia that the budget committee has recommended to the duma that the government assume complete control and fix prices.

### Denies Dumba's Death.

Vienna, Nov. 16.—Official death was made here on Tuesday afternoon of reports widely circulated abroad that Dr. Constantin Dumba, former Austrian ambassador to the United States, was dead.

### Japanese Submarine Destroyed.

Kobe, Japan, Nov. 16.—It was announced here two seamen were killed and six officers and eighty sailors were wounded by an explosion which destroyed the Japanese submarine No. 4.

### LOCAL ITEMS

Mrs. W. H. Hinterthuer of Neenah

is a guest at the J. R. Nagan home.

Miss Anna Wheeler is visiting with  
relatives in Fond du Lac for a week.

Arthur Zimmerman has accepted a  
position in the First National Bank.

Porcy Daly transacted business in  
Milwaukee and Chicago several days  
the past week.

Special Fur Sale Thursday and  
Friday, Ready-to-Wear Parlor. I. E. Wilcox.

Mrs. Cleve Akey spent several days  
at Marshfield last week visiting with  
relatives and friends.

Hugh Boies is home from Minne-  
sota to spend a week with his family  
at the south side.

Miss Eleanor Skaffel has accepted  
a position as stenographer in the  
Bank of Grand Rapids.

James Jensen returned Saturday  
from Milwaukee where he spent several  
days on business and pleasure.

Tim Ebaehor of the town of Lin-  
wood Portage county, was in the city  
Sunday visiting with friends.

Mr. and Mrs. George Forand went  
to Mauston Tuesday on a trip com-  
bining business and pleasure.

Farmers institutes will be held in  
Arpin and Rudolph this winter. The  
dates will be announced later.

Special Fur Sale Thursday and  
Friday, Nov. 23 and 24, 1916, at the  
Ready-to-Wear Parlor. I. E. Wilcox.

Mrs. H. A. Sackor of Wausau  
spent several days in the city last  
week visiting with friends and relatives.

Miss Bernadette Schlatterer of  
Mosinee spent Sunday in this city  
with her mother, Mrs. L. M. Schlatterer.

Miss Anna Wheeler is visiting her  
sister in Fond du Lac for a week or  
ten days, having come down last Sat-  
urday.

Harry Hagerstrom of Stevens  
Point spent several days in the city  
last week visiting his relatives and  
friends.

Mrs. W. H. Lake and daughter  
Emma are guests at the home of  
their daughter, Mr. and Mrs. Ed Do-  
dole, Jr.

Mrs. Mary B. Vaughan of Pitts-  
ville, a former resident of this city,  
has entered the Veterans' Home at  
Wausau.

K. A. Hansen, one of the solid  
farmers of the town of Grand Rapids  
favored this office with a pleasant  
call last Friday.

Officer Louis Panter and Arthur  
Stoklos departed on Monday for Gliden  
where they will spend several  
days deer hunting.

Will Schroeder, assistant cashier  
at the Bank of Grand Rapids, has  
been confined to his home the past  
week with sickness.

Mrs. James Dolan leaves this week  
for a visit with her mother, Mrs.  
Mary McKercher, and sister, Mrs.  
I. O. Mills at Lancaster.

Frank Lamberton has accepted a  
position with the Dairy Ice and Coal  
company as collector, having started  
in on his work last week.

Irv. Henry, Andy Lund and Ben  
Hager returned from the north  
woods on Saturday and each brought  
with him a fine deer that they had  
succeeded in killing.

The Nash bunch came down from  
Boulder Junction Saturday night  
after having been up in the deer  
country for a little over a week.  
They brought with them two deer,  
having failed to get their full allot-  
ment. They report having seen num-  
erous deer, but there seemed to be  
very few bucks among the lot.

Charley Kruger spent several days  
in Chicago last week on business.

—Mr. A. Stindler will be at the  
Ready-to-Wear Parlor Thursday and  
Friday, Nov. 23 and 24, with a com-  
plete line of furs and fur coats. I. E.  
Wilcox.

Rev. L. E. Peckham of the town of  
Grand Rapids was among the pleas-  
ant callers at the Tribune office on  
Wednesday.

Mr. and Mrs. A. F. Jones and Mr.  
and Mrs. J. Gerow were at Wausau  
on Friday where they attended a  
meeting of hotel keepers held in that  
city.

Mesdames Ernest Kristofski and  
Geo. Smallbrook departed on Wed-  
nesday noon for Milwaukee to attend  
the funeral of their uncle, William  
Benkey.

The Green Bay Bridge Club was  
entertained by Mrs. J. J. Cunningham  
on Friday evening and the honors of  
the occasion were carried off by Mrs.  
W. C. McGlynn.

Mr. and Mrs. Robert Steel, who  
have been spending the past summer  
at Cranmoor, leave today for Wau-  
sua where they will live during the  
ensuing winter.

J. L. Reinhart and family are  
moving into their beautiful new  
home this week, which was recently  
completed on the corner of Eighth  
and Baker streets.

Miss Anita Hollmuller, who is  
attending the Normal at Stevens  
Point, spent Saturday and Sunday  
with her parents, Mr. and Mrs. John  
Hollmuller, in this city.

Mr. and Mrs. Matt Kaudy are  
packing their household goods pre-  
paratory to moving to Ripon, where  
Mr. Kaudy has accepted a position  
with the Haus Brewing Co.

At the meeting of the county board  
in Lincoln county last week it was  
decided to buy two automobiles, one  
for the use of the sheriff and one for  
the highway commissioner.

John Akey of Merrill, owner of the  
truck "Queenie," who is at present  
showing in the south, intends to  
go to South America with "Queenie."

One of the stunts done by this car  
is to drive an auto thru the crowded  
streets.

Jensen & Ebbe received a large  
shipment of Ford cars last Friday  
which they are starting in their new  
branch which they recently com-  
pleted on the west side. The new  
building will accommodate about 30  
cars.

E. F. Deyo, who has operated the  
hotel at Port Edwards during the  
past fifteen years, has gone out of the  
hotel business and will probably  
move to this city to make his home.

G. M. Myers has taken charge of the  
hotel down there.

W. H. Upham Camp, Sons of Vet-  
erans, organized at Marshfield less  
than a year ago, has been disbanded.  
The camp was organized in March  
last year with a membership of 59.  
Owing to lack of interest the charter  
was surrendered.

Stevens Point Gazette: Mrs. Mary  
Fahl of Grand Rapids visited friends  
in this city last Friday night while  
enroute to Appleton on a business  
trip. Mrs. Fahl is better remembered  
here as Mrs. John McKinley, a former  
resident of Stockton and Buena  
Vista.

The jump that the old cow made  
when she jumped over the moon isn't  
a circumstance to the jump made by  
beef and lamb the day last week,  
when it took a flyer of a cent to a  
cent and a half. If the present state  
of affairs continue we can give those  
old nursery rhymes cards and spades  
and still beat them to the wire. Of  
course, so long as we are breaking a  
record, we do not mind it so much.

The various societies of the Scan-  
dinavian Moravian church will hold  
their annual Norwegian supper in  
the G. A. R. hall this coming Sat-  
urday. Patrons will have their choice  
of luteisk or chicken-pie.

—Bring your fur repair work to  
the Ready-to-Wear Parlor Thursday  
and Friday, Nov. 23 and 24, 1916.  
Mr. Stindler will gladly estimate  
the price of work. I. E. Wilcox.

The Masons held a dancing and  
card party at their hall on Friday  
evening at which there was a large  
attendance and a good time. They  
expect to have regular events of this  
sort in the future. At the dance Fri-  
day night a number of the old-  
fashioned dances were indulged in.

John Bell, Jr., who has been at  
Dexterville during the past summer  
where he has been overseeing mat-  
ters on the Frank Hiles farm, spent  
Sunday in this city visiting his fam-  
ily. Mr. Bell expects to finish his  
trip to Dexterville this week and  
return to this city for the winter.

Over in Waushara county the  
county board has abolished the train-  
ing school, their excuse being that  
the calls for money were so contin-  
uous and persistent that it was costing  
more than the school benefitted the  
county. Sort of another case of kill-  
ing the goose that laid the golden  
egg.

F. G. Mengel, district engineer in  
charge of this section of the state,  
was at Stevens Point on Friday  
where he appeared before the county  
board and gave them a talk on road  
matters in general. The Portage  
county supervisors were considering  
the feasibility of changing to the  
truck line system, a plan that is  
strongly advocated by all of the big  
road builders these days.

Big old "snapping" turtles, which  
are found in the river and sloughs,  
are being caught and marketed this  
fall. They are shipped by express  
to Philadelphia, where they bring  
eight cents a pound alive, and the  
hunting of them is a paying propo-  
sition. Last week over 700 pounds  
were shipped in two days from Rich-  
land Center. The meat is nice and  
white, is good fried, and when made  
into soup makes a fine dish.

Four of our local churches will  
unite in a union Thanksgiving ser-  
vice in the Baptist church on Thurs-  
day morning at 10:30 o'clock.  
The churches uniting in this service  
will be the Methodist, Scandinavian  
Moravian, Baptist and Congrega-  
tional. The pastors of these churches  
will take part in the service. The  
sermon will be preached by the Rev.  
H. B. Johnson. As is usual at these  
services the offering will be given to  
some worthy undenominational  
cause. Make it a point to be present.

Will Hurley, who has been in the  
northern part of the state hunting  
deer since the beginning of the sea-  
son, returned on Saturday. Mr. Hur-  
ley reports that a number up in the  
neighborhood where he was had to  
pay fines this year because they had  
not kept within the law, and that the  
game wardens seemed to be more  
active this year than ever before.  
Nearly every man who came out of  
the woods was compelled to allow the  
wardens to go thru his luggage,  
something that was never before  
done, and the result was that several  
were caught with the goods on them  
and had to cough up a substantial  
fine in order to continue on their  
way home. Mr. Hurley was unable  
to hunt very much while he was up  
in the woods, owing to an injury to  
his eye which he sustained while  
splitting wood, being struck in the  
eye by a small piece of wood that  
caused a very painful injury.

### THANKSGIVING READING

List of books in the Children's  
Room of the Public Library.

History

Blaisdell—Short Stories from Amer-  
ican History.

Wiggins—Story Hour.

Wilkins—Humble Romance.

—KLUCK IS DISCHARGED

Stevens Point Journal: Sergeant  
Felix V. Kluck has been honorably  
discharged from the United States  
army for physical disabilities incur-  
red while in the service. He is to  
receive a permanent pension of \$55.03  
a month.

The discharge papers which he re-  
cently received are dated Oct. 7. His  
disabilities resulted from a 500-foot  
fall from a disabled aeroplane while  
on Mexican border scout duty with  
the army aviation corps last sum-  
mer.

Serge Kluck complains of a  
stiffness of his right arm but says  
the condition is slowly improving.  
The fractures of his hip have healed  
entirely, he says. Apart from the  
stiff arm he is in good health.

Mr. Kluck's enlistment was in the  
Second company, C. A. C., Ft. Han-  
cock, U. S. A. He had been trans-  
ferred from the coast art-  
illery service to the aviation corps.  
Mr. Kluck has no definite plans for  
the future, but expects to remain at  
home for the present. His father is  
Frank Kluck, the Little Waupun  
merchant.

### ADVERTISED MAIL

List of advertised mail at the post-  
office in Grand Rapids, Wisconsin,  
November 21, 1916:

Ladies—Mrs. J. Gussman; Mrs.  
Alma Warner; Mrs. L. R. Woyars;  
Gleason—Mr. Burt Conklin;  
Mr. Frank Patterson.

Merrill Herald: Thursday even-  
ing at 7 o'clock, M. H. Briesemeister  
of Milwaukee, accidentally shot him-  
self through the left knee, while in a  
hunting camp about five miles west  
of Grandfather. He was brought to  
this city by Dr. Kelly and is being  
treated at the home of Miss Theta  
Mead, the trained nurse, on Center  
street. It is thought that he will be  
able to be taken to Milwaukee this  
evening.

"THANKSGIVING"

FOR

\$2, \$3, \$4

\$10

or

any amount

Few occasions are anticipated  
with a keener sense of pleasure  
than this one big day. Turkey is  
associated with Thanksgiving as is  
firecrackers with July 4th. With  
this we are reminded of the Roast-  
er, Carver, Cake Tin, Stew Pan,  
Nut Cracks and Soup Ladles, all of  
which you can obtain at our store  
in various styles and sizes.

Nash Hardware Co.

# JOIN OUR CHRISTMAS BANKING CLUB

## and HAVE MONEY

### YOU CAN START NOW START

YOU CAN START WITH

1c 2c 5c 10c OR MORE

PLAN OF THE CLUB

The Plan Is Simple: You begin with a certain amount, 1c, 2c, 5c, or 10c, and in-  
crease your deposit the same amount each week. Or, you can begin with a certain  
amount, 50c, \$1.00, \$5.00, or any amount, and deposit the same amount each week.

HOW TO JOIN

Look at the different Clubs in table below and select the one you wish to join, the  
1c, 2c, 5c, 10c, 50c, \$1.00, \$5.00, or any of the clubs; then come to our Bank with the first  
weekly payment. We will make you a member of the Club and give you a Christmas  
Banking Club Book showing the Club you have joined.

## EVERYBODY CAN JOIN--Men and Women, Boys and Girls, Little Children, the Baby

You can take out memberships for your family and your friends. An employer can take out memberships for his employees. We will welcome everyone.

WHAT THE DIFFERENT CLUBS WILL PAY YOU

YOU CAN BEGIN WITH THE LARGEST PAYMENT FIRST AND DECREASE YOUR PAYMENTS EACH WEEK

THE REASONS FOR THE CLUB

To provide a way for those of moderate and even small means to bank their money.  
To teach "the saving habit" to those who have never learned it.  
It makes your pennies, nickels and dimes, often foolishly spent grow into dollars;  
dollars grow into a fortune. Start your fortune today.  
To give you a Bank connection and show you how our Bank can be of service to you.

FOR OLD AND YOUNG

The sensible thing for all parents to do is to  
join our Christmas Banking Club and also put  
every member of their family into it. This will teach them the value of money and how  
to bank and HAVE MONEY. Maybe this little start you give them now may some day  
set them up in business or buy them a home.

How often have you wished that your parents had taught you early the value of  
banking your money. You would be well-off today. Don't make the same mistake with  
YOUR children.

WE PAY 3 PER CENT INTEREST IN OUR CHRISTMAS BANKING CLUB

# The Citizens National Bank

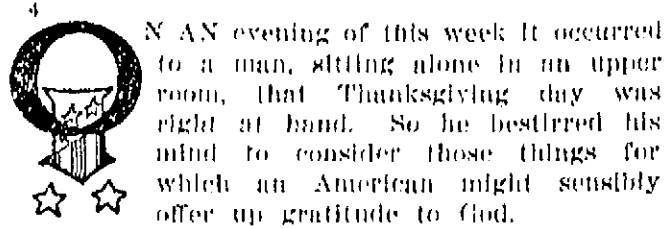

# THANKSGIVING

**G**OD be merciful unto us, and bless us; and cause his face to shine upon us; Selah. That thy way may be known upon Earth, thy saving health among all nations. Let the people praise Thee, O God; let all the people praise Thee. Then shall the Earth yield her increase; and God, even our own God, shall bless us. God shall bless us; and all the ends of the Earth shall fear him.

From the 67th Psalm.

## PRAISE HIM for This Most Precious Gift

AN evening of this week it occurred to a man, sitting alone in an upper room, that Thanksgiving day was right at hand. So he bestowed his mind to consider those things for which an American might sensibly offer up gratitude to God.

He reflected that across the Atlantic millions of human beings were at that very moment engaged in the dreadful task of killing other human beings with every invention which ingenuity and skill could bring forth from the laboratories of science and the workshops of industry.

In other lands at that very moment tens of thousands upon tens of thousands of helpless folk—feeble, aged men and women, mothers with babes clinging convulsively to their breasts, little children sobbing in terror, a vast army of the innocent and the anguished—were enduring the extremities of exposure, of hunger, and of despair as they fled from their wasted farmsteads and burning villages, escaping from the pitiless cruelty of savage men only to be down to suffer and die under the pitiless skies of God in the winter and the bitter storms.

At that very moment that dreadful war laid half the world in the blackness of its darkness and from that horrid cloud rained destruction upon unhappy Europe—upon her ancient capitals, upon her pleasant cities, upon her villages, her fields, her temples, her treasures of art, upon all the accumulations of a thousand years of genius, of learning, of industry, of skill and of patient advancement of the happiness and the civilization of the race of man.

So he that considered all this wickedness that was being done under the sun, this drunken dance of death and hell above the fields corpses and the multitudinous graves, this awful nightmare of indescribable woe and wrath, said in the bitterness of his heart that no God ruled over such a maniac world and there was no Thanksgiving due to the giver of gifts that were not good, but everyone notwithstanding.

And when the man had made an end of his thinking, he went and stood in a window and looked out upon the evening, because it was fair to see.

He saw in vision at that instant the vastness of the republic and the multitude of the good and happy folk who live under the shelter of its strength. He reflected how brief a time had thus magnified the works of our pioneer fathers and our pioneer mothers, those brave and simple men and women whose names should never be mentioned with anything but proud gratitude.

And to this American, glad with a great pride in the deeds of his people and the story of his country, and grateful to the Goodness which has guided and sheltered his fathers and his folk, lifted up his eyes to the night, to the quiet stars, to the broadening immensity above, and said in his heart:

"Thank God that I am an American!"

And, citizens, that is the one outstanding, splendid fact for which each one of us should soberly and most gratefully thank God on Thanksgiving day this year.

The finest thing we possess or ever can possess is just your American citizenship. It is neither necessary nor becoming, on this day or on any other day, to cheapen this birthright of ours by brag or spangled declaration.

But it is highly becoming on this Thanksgiving day to feel a deep gratitude and a manly pride in this heritage.

### WHERE THEY CALL HIM "CHARLIE."

Charles M. Schwab, the Bethlehem steel king, is probably the most beloved "boss" in America. His men say there would be no strikes if others were like him. The American Magazine prints an article about him in which it occurs:

"They call him 'Charlie' at Homestead; he is 'Charlie' when he goes back there now to visit the 'boys.' Those who were there in the old days he still knows by name, and just how long they have been on the job. When he went down to Homestead to say good-bye after resigning as president of the Carnegie Steel company, five thousand men turned out in a body to wish him good luck."

### HOW BRITISH ARMY GETS ITS MAIL.

The British may pride themselves on the efficiency of their transport of both men and mails. One of the biggest armies ever raised in any country has been conveyed over the sea without the loss of a single unit, and a prodigious amount of mail matter is handled with similar effectiveness.

The army postal arrangements, which are on a vast scale, are working admirably. Letters sent from England to the expeditionary force in France take three days to reach men in billets and four days for soldiers in the trenches.

And so we firmly believe you do feel. We all hear it repeated that patriotism is a thing of the past; that our people have become commercialized; that the masses have no deep-seated loyalty to the country; that our rich men put dollars above the obligations of their citizenship; that our poor folk care little for the ideals of free government; that we Americans are decadent in the virtues and valor which marked our fathers.

That is not true. If there be any power in the world which plots war against us Americans and promises itself victory over us on the assumption of our decadence in loyalty, that power will find how terrible is its mistake when our country calls her sons to battle in her defense.

We have, it is true, in our capacity as a collective people, left undone things that should have been done and done things which should have been left undone; and there is more truth than there should be in much that is jeeringly said for those who hate us.

We acknowledge that much of our politics offends common decency.

We see, here and there, painful evidence of corruption among lawmakers and even among the judges, who should know only justice and integrity.

We see rich men who do betray their country and foul their hands and sell their souls with most infamous dealings and most shameful profits.

We see Americans who do put the dollar above every consideration of right and duty, above the claims of our common humanity.

But while these things are true, it is true also that the heart and conscience of the American people, take them as a nation, are sound and sane and wholesome.

The blood of our fathers still runs in the veins of their sons. The spirit of the nation may indeed seem to slumber in the soft bed of long-enjoyed peace and security, but let war come against the land and no man need doubt that that spirit will spring up instantly awake.

We can rightfully be grateful that it has fallen to our happy lot to live in this most wonderful of all ages and to be citizens of this most wonderful of all nations.

Let your hearts swell with just pride as you contemplate your country, so august, so splendid, so renowned in the earth.

Look upon your flag as it streams its bright folds yonder above your heads with proud and happy eyes. Remember how honorable is its story, and forget not how many thousands of brave and good men died that it might wave proudly, the ensign of a free people.

Tell to your children the story of their forebears, of those men and women who, mould the wilderness and forests that stood where now stand mighty cities and stretch cultivated farms, erected, with hardships and endurance and most heroic faith and valor, the noble edifice of our republican liberties.

Speak to them of Bunker Hill and Valley Forge and Saratoga and Yorktown, and of the great Declaration—that most famous Charter of Human Freedom.

Tell them to thank God for their fathers' and mothers' hardihood and courage, for the wars they fought, for the victories they won.

Tell them to salute their flag with high and proud hearts.

Tell them to thank God this Thanksgiving day that they are Americans.

And then do you soberly, gratefully, proudly thank God yourself that you are an American.

Oh, dear and mighty motherland, what better gift or more to be desired could God give than to be born and to die, strong Daughter of Liberty, between thy shining feet—from the Chicago American.

The saucer thus formed. The pulp itself is pure and the water stored in it is likewise pure and refreshing.

Not all the water-bearing cacti are as grateful to furnishing man, however, as the "water barrel." For most of them have protected themselves against the maraudings of those who would drink and live by imparting a bitter taste to the water they contain. The "perote," especially, which abounds in the plains and deserts of Arizona, has a trick of discouraging depredations upon it, for its plump and juicy pulp secretes a bitter and poisonous juice.

In the last dozen years scientists have interested themselves in the study of the cactus for its possibilities as food, fodder and economic by-products. Dr. Leon B. Lundone, foremost in the study of this desert plant, several years ago conducted extensive experiments in Los Angeles to ascertain the value of the thornless cactus as an article of food for human beings.

In an effort to prove his contention that it contains food properties sufficient to enable a man to work 15 hours a day, he and his two secretaries for two weeks lived on a daily diet of the leaves and fruit of the cactus, the former being served green or fried and the latter either raw or cooked. While the "cactus squad" survived the experience and professor to have enjoyed their novel diet, it is a fact that the cactus never has attained the popularity of a fleet mignon.

In the whole vegetable kingdom probably there is not another plant family having so many differentiations of form as the cacti. For it is possible to find among them species that crawl and creep like vines, other than stand erect in a single unbranching stalk, like a green living monument of the desert; still others that are rooted to the spot, with their highest growth close to the ground and bearing almost no resemblance to usual forms of vegetation, and others, again, that branch out in thick unblooming branches.

One of the most curious of these is the "cholla," which grows in the arid regions of northern Mexico. The United States troops traversed a region whose only vegetation is the barbed and forbidding cactus. To any but a cowboy or a trained plainsman of the Southwest, inhabitants themselves of the "cactus belt," this plant seemingly has no more value than the vilest weed, but it may well be that it may prove of great value to the troops in the absence of water, fodder, or even food for human beings.

In the punitive expeditions there are many cow punchers of the "cactus belt" serving as scouts, and in the cowboy and the Indian of the Southwest the lowly cactus has its greatest admirer, for they know what a game struggle for life this plant has to make against an unrelenting desert soil. Even their ponies and cattle and the poor beasts of the desert know of these uses of the cactus for water and fodder, says the New York Herald.

There are some thousand varieties of this monstrous vegetable family, not counting the 300 varieties of the agave, or century plant—incorrectly included by many—in northern Mexico. The varieties of the yucca plant and all other forms of vegetation known to the arid region have the same faculty of sucking up from the soil every drop of the all too little moisture in it and storing it up in their tough and leathery leaves and roots.

Of the many varieties perhaps the most remarkable is that member of the family known to those schooled in desert craft as the "water barrel." This plant is shaped somewhat like a beer keg and is about the same size. Through all the years of its growth it has been sucking up what moisture the parched earth contained and retaining it. It is the sole reliance of desert dwellers in time of drought, and the troops, far from water holes and with water scarce, may yet be obliged to drink from it.

The "water barrel" is tapped by slicing off the top with a sword or machete and pouring the pulp until the water contained in it wells up into the saucer thus formed. The pulp itself is pure and the water stored in it is likewise pure and refreshing.

## The Governor's Dilemma

By HAROLD CARTER

(Copyright, 1918, by W. G. Chapman.)

The governor was not playing the game as it should be played. That much was common talk at the capitol, up an attitude of opposition to Boss Lloyd, but why had he run for governor under Lloyd's auspices? He must have known Lloyd was not giving away something for nothing.

There were some who justified the governor in claiming that a man cannot get into political life at all unless he is willing to accept some shady backing. But Governor Peters had swung round the minute he took the oath of office, announced that he meant to be the "People's Governor," and fought Lloyd tooth and nail, and fought him to a standstill.

Peters had been Boss Lloyd's lawyer in the old days. He knew the secret tragedy of his life. Peters' wife had left him a few years after their marriage, taking with her their only child, a boy. Lloyd, with all his influence, had never heard of her again, had never set eyes on her since that day. Peters had still been trying to discover her when Lloyd nominated him for office.

Peters had been a very quiet man. Few knew him; it was not till the news of his life story of the new governor that it was known he was a married man, with a son at the State university. Lloyd, in particular, had not known. When he knew he set to work to get Peters in leading strings, and he had him. He exulted as he walked up the hill toward the executive offices. He did not win when Governor Peters kept him waiting half an hour while he chatted with an old negro nurse, though other men would not have kept him waiting at all, and would have broken off any other interview immediately.

At last Lloyd was admitted into the governor's office. He sat down, triumph upon his face. Peters looked at him inquiringly. "Well, sir?" he asked.

"It isn't often I come here now, Mr. Peters," Lloyd began.

"Often enough for my requirements," answered the governor.

"Your requirements? Good Lord!" said the boss, breathing hard. "Ain't

you going to have the boy arrested?"

"What?" shouted Lloyd. "I'm going to send him to jail, and the news is going to be front-spaced on every paper in the state."

"I don't think so," returned Peters quietly. "I have no son."

"Say, that's something new, ain't it?"

"Not at all," said the governor quietly. "He's only an adopted son. His father wanted him, but, having found him, I thought it best to let him grow up unshamed. However, it seems to be in the blood, and I wash my hands of him. He's yours, Lloyd."

Lloyd stared at the governor. "He was a nephew of the brothers Robert and Andrew Poulis of Glasgow, printers and publishers, whose productions were the admiration of all their contemporaries, and whose edition of Horace, published in 1734, was hung up sheet by sheet, in Glasgow, and a reward offered for the discovery of a single error."

"This scion of an intelligent breed was a graduate of Glasgow university. After various experiences when a young man, even to serving as surgeon on a whaling ship, he finally settled in St. John and became a land surveyor, artist, analytical chemist and a civil and mechanical engineer. He surveyed the River St. John is still in vogue in the Crown and office of this province. His chemical knowledge ranged from analyzing ores to making his own whisky when overtaken by adversity."

"While operating as a mechanical engineer and owning a foundry he engaged the first steam ferryboat to cross St. John harbor, besides the first steam craft to ply the St. John river. Later on, when Mr. Poulis was the engineer of the light and signal service of the government of New Brunswick, his principal charge being Partridge Island, the harbor's entrance, whereon was an automatic fog bell, he proposed a steam whistle, steam whistles being then new to the world."

"Later on his suggestion was acted upon. There was no patent law then and though in his old age, blind and poor, he was given no compensation, and the inventor of the foghorn died in poverty."

"It has been determined that the fluids of insect bodies, for instance, freeze at a degree Fahrenheit, any vital function becoming impossible at this temperature. At temperatures between this point and the temperature at which death will occur, a strange condition of suspended animation exists, the organism being, as it were, between life and death. In such a state the vital functions stop work, as there is no activity in the body, no food is required. Animals placed in this state are readily restored by the gradual rise in temperature. This condition is compared to that of a clock with stopped pendulum, the mechanism of which could be at any moment started again by a slight impulse given to the pendulum."

"The Reason. Why are Indians more stoical in the face of death than white men?"

"That's easy. Indians are accustomed to dying."

"Country With a Future. America frequently fails to appreciate the size of Australia and the number of its people. This great continent has an area of 3,439,320 square miles with the tropical zone, and 1,825,201 square miles within the temperate zone. It has 5,000,000 people, almost wholly of British origin."

"Poverty and Disease. Investigations into the working and living conditions of the 30,000,000 wage-earners of the United States has revealed many things which are depressing especially among the unskilled low-paid group of workers. In spite of recent improvement in many industrial establishments the fight against unsanitary conditions is still an uphill one. Recent sanitary surveys show that the elimination of health hazards from industry is not a thing to be expected in the near future."

"Saved-Off Sermos. A fool always boasts of what he is going to do, but an old hen always lays the egg before she cackles.—Indianapolis Star.

"The man who invented and installed the first steam foghorn died blind and in poverty despite his varied attainments and achievements in widely differing fields. He was John Poulis, a Scotchman, who came to St. John, N. B., in the early years of the last century."

An interesting description of this versatile Scot is given in a paper read before the St. John Historical society by William Murdoch. C. E. Murdoch says of Poulis:

"He was a nephew of the brothers Robert and Andrew Poulis of Glasgow, printers and publishers, whose productions were the admiration of all their contemporaries, and whose edition of Horace, published in 1734, was hung up sheet by sheet, in Glasgow, and a reward offered for the discovery of a single error."

"This scion of an intelligent breed was a graduate of Glasgow university. After various experiences when a young man, even to serving as surgeon on a whaling ship, he finally settled in St. John and became a land surveyor, artist, analytical chemist and a civil and mechanical engineer. He surveyed the River St. John is still in vogue in the Crown and office of this province. His chemical knowledge ranged from analyzing ores to making his own whisky when overtaken by adversity."

"While operating as a mechanical engineer and owning a foundry he engaged the first steam ferryboat to cross St. John harbor, besides the first steam craft to ply the St. John river. Later on, when Mr. Poulis was the engineer of the light and signal service of the government of New Brunswick, his principal charge being Partridge Island, the harbor's entrance, whereon was an automatic fog bell, he proposed a steam whistle, steam whistles being then new to the world."

"Later on his suggestion was acted upon. There was no patent law then and though in his old age, blind and poor, he was given no compensation, and the inventor of the foghorn died in poverty."

his name to a bit of worthless paper, to buy her jewelry. You had the latter hushed up, but it's known. And there are the witnesses who'll swear to it. I tell you, governor, you can choose right now between signing that bill and saving your son."

Governor Peters drummed his hands on the desk. "Is that all?" he asked quietly, when Lloyd had finished. "Well, ain't it enough?"

"You confess to having trapped him? You have been spying on the boy, turning him on to ruin me? That woman, Sadie Du Pas, is one of your people. Everybody knows who she is and what she has been. Everyone knows she was paid by you. How will that look?"

"Look?" snorted Lloyd. "Why, I suppose people would say, 'That's a smart trick Boss Lloyd pulled off on the governor.' But they won't get a chance to say it, because you'll turn down that bill."

Very deliberately Governor Peters stretched out his hand and took a document from his desk. With steady fingers he wrote his name at the bottom. "There's your answer, Mr. Lloyd," he said.

Lloyd sprang to his feet, his face white. "You—you've done it," he stammered. "All right. You'll see what mercy that kid will get. That's your last word, is it?"

"No," answered Peters. He rang a bell, and his secretary, a spectacled young fellow with sandy hair, came in. "Johnson," said the governor, "you heard all that?"

"Every word," replied the other.

"Have I prepared for the press exactly as it occurred, and explain why we used the dictaphone?"

Boss Lloyd laughed contemptuously. "That won't go," he retorted, "or guess the people will think the laugh's on you, not me. A governor turned policeman and using a dictaphone to trap a caller! Maybe someone's used the dictaphone on you."

"Perhaps," said Peters. "Are you going to have the boy arrested?"

"What?" shouted Lloyd. "I'm going to send him to jail, and the news is going to be front-spaced on every paper in the state."

"I don't think so," returned Peters quietly. "I have no son."

"Say, that's something new, ain't it?"

"Not at all," said the governor quietly. "He's only an adopted son. His father wanted him, but, having found him, I thought it best to let him grow up unshamed. However, it seems to be in the blood, and I wash my hands of him. He's yours, Lloyd."

Lloyd stared at the governor. "He was a nephew of the brothers Robert and Andrew Poulis of Glasgow, printers and publishers, whose productions were the admiration of all their contemporaries, and whose edition of Horace, published in 1734, was hung up sheet by sheet, in Glasgow, and a reward offered for the discovery of a single error."

After various experiences when a young man, even to serving as surgeon on a whaling ship, he finally settled in St. John and became a land surveyor, artist, analytical chemist and a civil and mechanical engineer. He surveyed the River St. John is still in vogue in the Crown and office of this province. His chemical knowledge ranged from analyzing ores to making his own whisky when overtaken by adversity."

"While operating as a mechanical engineer and owning a foundry he engaged the first steam ferryboat to cross St. John harbor, besides the first steam craft to ply the St. John river. Later on, when Mr. Poulis was the engineer of the light and signal service of the government of New Brunswick, his principal charge being Partridge Island, the harbor's entrance, whereon was an automatic fog bell, he proposed a steam whistle, steam whistles being then new to the world."

"Later on his suggestion was acted upon. There was no patent law then and though in his old age, blind and poor, he was given no compensation, and the inventor of the foghorn died in poverty."

"The Reason. Why are Indians more stoical in the face of death than white men?"

"That's easy. Indians are accustomed to dying."

"Country With a Future. America frequently fails to appreciate the size of Australia and the number of its people. This great continent has an area of 3,439,320 square miles with the tropical zone, and 1,825,201 square miles within the temperate zone. It has 5,000,000 people, almost wholly of British origin."

"Poverty and Disease. Investigations into the working and living conditions of the 30,000,000 wage-earners of the United States has revealed many things which are depressing especially among the unskilled low-paid group of workers. In spite of recent improvement in many industrial establishments the fight against unsanitary conditions is still an uphill one. Recent sanitary surveys show that the elimination of health hazards from industry is not a thing to be expected in the near future."

## MILLINERY MODES LESS FANTASTIC

Season's Styles Show Improvement Over Those of the Previous Years.

FELT LIKELY TO BE POPULAR

Indications That Velvet Has About Had Its Day of Popularity—Russian and Arabian Suggestions Mark Headgear—Bullion Ornamentation Leads.

New York.—At least, there is to be said in regard to the fashionable pose: it is the simplest that the milliners have demanded in several seasons. That rakish tilt or the suggestion of them that have governed millinery during the last few years were difficult poses to achieve.

We have gone backward further than usual this season for an inspiration for new fashions, and the artistry and variety of the centuries that reached up to the days of Catherine de Medici have been overhauled to make an American costume and to France, American dollars.

Turning to Felt Predicted. It is highly probable that we will wear more felt as the season advances than we thought was advisable at the beginning of the season. Of course, velvet stands as the first choice, but there are thousands who are wearied already of this fabric which sweeps over the continent with the thickness and pertinacity of a plague of locusts as soon as August reaches its maximum heat. At any rate, these sweeping felt hats of the millinettes are a relief from the ordinary velvet hats.

This hat is quite exclusive. It is like a tilted saucer. The top surface is in one piece, rising a bit in the middle. The brim leaves the head entirely after it passes the crown. The color is peacock blue, the fabric is thick satin, the ornamentation consists of peacock eyes laid flat on the satin. But there is the really odd touch, very oriental: Beneath the upturned brim at the back there extends a piece of satin folded like a turban that reaches almost to the ears and disappears there. Holding it in place and reaching across the entire back of the head is a conspicuous barette of white and ruby crystals. Here is the Russian touch, for true, and if it sounds garish to you, wait until you see it on the right woman. It makes another hat in the afternoon seem commonplace.

Hats on Eastern Lines. There are also high embroidered velvet and satin hats that have been copied from native Russian costume, but the Arabian suggestions made by Bakst. These shapes rest squarely on the head, showing not a flicker of hair except over the ears and at the extreme back, and the brim reaches out and up, coming to four points well above the crown.

## Stomach Germs Routed

One Dose of Mayr's Wonderful Remedy Drives Them Out—Ends Torture.

Stomach poisons breed millions of germs that eat into your vitals, causing gas pressure, indigestion, constipation, torpid liver, auto-intoxication, yellow jaundice, gall stones, appendicitis, cancer and ulcers of the stomach and intestines, etc., etc. Thousands of sufferers have been restored by Mayr's Wonderful Remedy, among them justices of the Supreme Court, congressmen, doctors, lawyers, bankers, ministers, nurses, farmers, mechanics—persons of every class—probably your own neighbors. Stomach troubles are due mostly to catarrhal poison. Mayr's Wonderful Remedy removes that poison, thoroughly cleanses the system, drives out the disease breeding germs, always inflammation and ends suffering. Unlike any other remedy. No alcohol—nothing to injure you. One dose convinces. FREE book on Stomach Ailments. Write Geo. H. Mayr, Mfg. Chemist, Chicago, or obtain a bottle of Mayr's Wonderful Remedy from Otto's Pharmacy, or any reliable druggist, who will return your money if it fails.

## Get Baby The "Right" Food

The baby's health depends on its food. Get a food that should be mother's milk. A food with proper nourishment. Such a food is Thompson's Food (Peptonized).

A scientific food containing all those elements essential to the growth and health of your baby. If your baby is deprived of mother's milk, don't delay but start at once on Thompson's Food (Peptonized) and you will be delighted with results. Ready for use by simply adding water.

We suggest that you try a 50c package with our guarantee of satisfaction.

While Hearst's papers have been debarred from Canada and while the property in Mexico which he thinks he holds. Tough dealing for little Willie. Chilton Times.

"The west did it. The great west, steady, sand west. The west that gives the east its bread and puts the meat upon its table. The west won for Wilson. The west is coming into its own—politically speaking. Hereafter, when a party writes its platform and picks its candidates, it will pay less attention to what and who will carry New York and more to what the west wants."—St. Paul Daily News.

## NEW VARIETY CORN IS EARLIER

Wisconsin corn breeders have developed a new variety with which to "push the corn belt northward."

According to reports from E. J. Delwiche, in charge of the new branch station of the College of Agriculture, the new early dent variety, known as Wisconsin No. 25, is shown up favorably this season under varied conditions of soil and climate. It is about three weeks earlier in maturing than Wisconsin No. 8, which has heretofore been the most promising variety for the regions of the state having short growing seasons.

"At the Spooner Station the Wisconsin No. 25 is yielding more than 75 bushels to the acre," says Mr. Delwiche. "The corn was first sown on September 10, and ripe ears could have been expected September 1. The variety also did well at Cornish on a heavy silty loam soil. It is a very early maturing variety, and is well adapted to the north, where it grows this year, are nearly all favorable. As several hundred acres of Wisconsin No. 25 were planted during the past season, a considerable number of the ears are probably available. Names of growers will be supplied on request."

## MAKES MONEY RAISING FOOD FOR WILD DUCKS

Clyde Terrell, and Oshkosh boy, will soon be twenty-one years old. All his life he has lived in the lake region of central Wisconsin—the nesting, feeding and breeding place of thousands of wild ducks and geese. His father had studied the habits of these wild waterfowl for years, and as soon as the boy was able to walk he was taken to nearby lakes and ponds. Lying in the tall bushes on the shores, he learned the habits, and home life of the ducks; what they ate, how they ate, their hours for feeding, and where they ate; he learned to tell the different varieties by their "quacks," the way they flew, and by their form.

He started a little submarine garden of his own. As he grew older his business instinct was awakened. He thought it probable that nearly every owner of a small lake or pond had wished he could make it a paradise for ducks, and he had found that ducks came each season in great numbers to the places where the food they loved was most abundant.

He saw that the ducks were the food the ducks want? he asked himself, and, being a boy of action, immediately got busy.

He gathered seeds from the water plants and experimented with them. Then he cultivated the plants and improved them. His constant experimenting, with his firsthand observation, finally yielded fruit. He found that every wild duck was very fond of the tender shoots and bulbs of the water plants, and he set out thousands of plants, which attracted the ducks in a great number. He cultivated the plants carefully, and then started shipping them to nearby clubs for transplanting, or planted them near his lake, so that he discovered that because of their handsome arrowweed and delicate white flowers they were much in demand for ornamental purposes.

While lying concealed one day watching the ducks feeding in one of his ponds, young Terrell was struck by the fact that certain kinds of ducks were feeding almost entirely on certain kinds of plants. He waded out in the pond when they had flown away, examined the plants, and came to the conclusion, the water ducks, like the mallards, teal and pintails, preferred the wild rice, while the canvasbacks, redheads, blue-bills and other diving or deep water ducks attacked in preference the water hyacinth, plenty of wild celery. This lucky discovery proved the key to the feeding problem of wild fowl.

One more problem stood between the young naturalist and complete success. For years the raising of wild rice had been unsuccessful because most of the seeds did not germinate. Terrell discovered that this was because the seed dried out and died. He kept his seed in damp bags in cakes of ice until ready to plant. Now ninety-nine per cent germinate.

Last year his business amounted to several thousand dollars, and he is going into it even on a larger scale this year. His greatest honor came last December when he was the guest of honor at the annual banquet of the New York Game Conservation. He spoke before experts in his line on "The Food of Wild Ducks," and they listened with closest attention. The biological division of the Department of Agriculture has endorsed Terrell's work as an important influence for the conservation of valuable wild birds.—American Magazine.

## REASONS FOR BUTTER ADVANCE

Three broad-gauged guesses may be taken as the reason for the advance in butter prices. According to H. H. Hilliard of the College of Agriculture, University of Wisconsin, they are: "A greater demand for condensed milk, due partly to the European war; and owing to dry pastures and higher prices for feeding stuffs, a slight decrease in production on dry farms."

"Added to these specific causes and a larger output of cheese than ever before is the general fact of increased prices for food stuffs of all sorts, and it seldom happens that any given article of food will fall to follow, more or less, the price fluctuations of the mass."

"Under present conditions the farmer gets more than two-thirds of the total amount of money paid by the consumer for butter, and there is no positive indication that any step in the way of increasing the price of the market to boost prices and reap profits. The advance may be charged to a combination of circumstances."

## THE HIGH COST OF LIVING

Whether or not an embargo on foodstuffs would decrease the cost of living in this country is a question, but it seems as if it would. The prohibition, it is in the hands of Washington authorities and if they report to the president that an embargo will "put the prices down where they belong" it is altogether likely that Mr. Wilson will declare an embargo insofar as the export of foodstuffs is concerned.

However, one might as well face the facts in the beginning. The present high prices are due primarily to the European war, and the curtailment of the production of foodstuffs in the European countries. It stands to reason that neither England, France, Germany, Russia nor Italy has produced a normal crop when the fields have had to be tilled by women and children. The best methods of farming and unfitted physically to get the same results as men could. The women of Europe have sacrificed themselves heroically in trying to take the places of the men at the front, but it is obvious that they cannot carry on the work of each nation as well as it was carried on before the war. There is a certain amount of labor to be done in the world. A time of war not only fails to lessen the amount of labor necessary, but while the added burden of munition making is going on the soldier at the front and the wife, the widow, the child and the invalid at home must be fed.

Foreign countries have been bidding high for foodstuffs produced in America. Our normal crop has been decreased, particularly the wheat crop, thru bad weather conditions. And while the people of this country naturally would like to continue sending as much wheat, corn and other products as possible to all Europe without discrimination, there is a limit and it appears that the limit has been reached.

An embargo on foodstuffs would, no doubt, present some unpleasant and uncomfortable problems to the American government, but it would be a far more vital problem, than the one of the others put forth, since the European war began. The first duty of America is to Americans.—Marshfield Times.

## MANY YOUNG FARMERS WILL TAKE SHORT COURSE

A number of young men from this section of the state are planning to enroll for the short courses in agriculture, which, on December first, opens its thirty-first consecutive term of fourteen weeks instruction in better farming methods, at the college of agriculture, University of Wisconsin, Madison.

According to reports from D. H. Ols, in charge of the course, already there have been received applications from a total of forty-five prospective students, living in thirty different counties of the state. This number, of course, will be increased steadily between now and the opening of the term.

It is thought that a large majority of the men who completed their first year's study last winter, will return for the second term of the course.

In an effort to make the course of even greater value to young men and women who desire fundamental training in the art and science of farming, as practiced in Wisconsin, the course has been strengthened and improved during the past year. Students will have a better chance to select work in which they are most interested, and new instructors and equipment have been added to render more direct service to those who attend.

Owing to the big demand for trained poultrymen, arrangements have been made whereby courses in poultry husbandry may be taken instead of restricted periods as heretofore.

Wm. J. Tempas, Arpin; Herbert Molter, Marshfield; and Miss Bessie Lipsitz, Grand Rapids, attended the short course for the first time last winter, and may complete their studies this year.

Dick Nash returned Monday from Manitowish where he has been employed the past seven months. Mrs. C. Peterson and Mrs. A. Pauls of Lowell, Massachusetts, were guests at the Berg home last week, having come here to attend the funeral of the former's son and the latter's cousin, Bernard Peterson, which occurred at the Wm. Berg residence in Grand Rapids on Wednesday. They departed Friday morning for Chicago where they will visit Mrs. E. Peterson and other relatives for some time before returning to their homes.

Albert Larson of Port Edwards spent Sunday at the N. Larson home. David Peterson of Chicago is a guest at the Berg home this week. Miss Bessie LaVigne was a week end visitor at her home in Grand Rapids.

Mrs. K. Johnson and daughter left Friday for Sheboygan where they will visit friends.

Mr. and Mrs. L. Koch are entertaining their daughter from Lebanon, South Dakota.

Eric Newman spent Saturday and Sunday at his home in Grand Rapids. Mrs. Bernard Peterson of Chicago visited at the home of her parents, Mr. and Mrs. Eric Berg, last week.

Paul Schultz and Ernest Matthews have secured employment at North Grandon.

Frank Thomas has returned to Racine where he is employed. He has been visiting home folks here for a few days.

Axel Perslund arrived here Friday from Irma, for a few days visit with his mother.

Miss Anna Cepress from Grand Rapids spent Saturday and Sunday at the home of John Kozlowski. Mr. and Mrs. John Jagodzinski, Sr. and Mrs. John Jagodzinski, Jr. spent Sunday at the home of their parents, Mr. and Mrs. Lubeck.

There will be a basket social at the Turner school house Friday evening, November 24.

"The corn was first sown on September 10, and ripe ears could have been expected September 1. The variety also did well at Cornish on a heavy silty loam soil. It is a very early maturing variety, and is well adapted to the north, where it grows this year, are nearly all favorable. As several hundred acres of Wisconsin No. 25 were planted during the past season, a considerable number of the ears are probably available. Names of growers will be supplied on request."

Mr. Delwiche says that this variety will do for either crib or silo. It grows from seven to nine feet high, is leafy, and not coarse in stalk. The ears are small and a deep golden color. The kernels are deep well defined, and much harder than most dent varieties, also not flinty in character. From sixteen rows to the ear, the ears are about 85 per cent, which is unusually high for a northern grown variety.—Spooner Advocate.

Clyde Terrell, and Oshkosh boy, will soon be twenty-one years old. All his life he has lived in the lake region of central Wisconsin—the nesting, feeding and breeding place of thousands of wild ducks and geese. His father had studied the habits of these wild waterfowl for years, and as soon as the boy was able to walk he was taken to nearby lakes and ponds. He started a little submarine garden of his own. As he grew older his business instinct was awakened. He thought it probable that nearly every owner of a small lake or pond had wished he could make it a paradise for ducks, and he had found that ducks came each season in great numbers to the places where the food they loved was most abundant.

He saw that the ducks were the food the ducks want? he asked himself, and, being a boy of action, immediately got busy.

He gathered seeds from the water plants and experimented with them. Then he cultivated the plants and improved them. His constant experimenting, with his firsthand observation, finally yielded fruit. He found that every wild duck was very fond of the tender shoots and bulbs of the water plants, and he set out thousands of plants, which attracted the ducks in a great number. He cultivated the plants carefully, and then started shipping them to nearby clubs for transplanting, or planted them near his lake, so that he discovered that because of their handsome arrowweed and delicate white flowers they were much in demand for ornamental purposes.

## REASONS FOR BUTTER ADVANCE

Three broad-gauged guesses may be taken as the reason for the advance in butter prices. According to H. H. Hilliard of the College of Agriculture, University of Wisconsin, they are: "A greater demand for condensed milk, due partly to the European war; and owing to dry pastures and higher prices for feeding stuffs, a slight decrease in production on dry farms."

"Added to these specific causes and a larger output of cheese than ever before is the general fact of increased prices for food stuffs of all sorts, and it seldom happens that any given article of food will fall to follow, more or less, the price fluctuations of the mass."

"Under present conditions the farmer gets more than two-thirds of the total amount of money paid by the consumer for butter, and there is no positive indication that any step in the way of increasing the price of the market to boost prices and reap profits. The advance may be charged to a combination of circumstances."

## NEW VARIETY CORN IS EARLIER

Wisconsin corn breeders have developed a new variety with which to "push the corn belt northward."

According to reports from E. J. Delwiche, in charge of the new branch station of the College of Agriculture, the new early dent variety, known as Wisconsin No. 25, is shown up favorably this season under varied conditions of soil and climate. It is about three weeks earlier in maturing than Wisconsin No. 8, which has heretofore been the most promising variety for the regions of the state having short growing seasons.

"At the Spooner Station the Wisconsin No. 25 is yielding more than 75 bushels to the acre," says Mr. Delwiche. "The corn was first sown on September 10, and ripe ears could have been expected September 1. The variety also did well at Cornish on a heavy silty loam soil. It is a very early maturing variety, and is well adapted to the north, where it grows this year, are nearly all favorable. As several hundred acres of Wisconsin No. 25 were planted during the past season, a considerable number of the ears are probably available. Names of growers will be supplied on request."

Mr. Delwiche says that this variety will do for either crib or silo. It grows from seven to nine feet high, is leafy, and not coarse in stalk. The ears are small and a deep golden color. The kernels are deep well defined, and much harder than most dent varieties, also not flinty in character. From sixteen rows to the ear, the ears are about 85 per cent, which is unusually high for a northern grown variety.—Spooner Advocate.

Clyde Terrell, and Oshkosh boy, will soon be twenty-one years old. All his life he has lived in the lake region of central Wisconsin—the nesting, feeding and breeding place of thousands of wild ducks and geese. His father had studied the habits of these wild waterfowl for years, and as soon as the boy was able to walk he was taken to nearby lakes and ponds. Lying in the tall bushes on the shores, he learned the habits, and home life of the ducks; what they ate, how they ate, their hours for feeding, and where they ate; he learned to tell the different varieties by their "quacks," the way they flew, and by their form.

He started a little submarine garden of his own. As he grew older his business instinct was awakened. He thought it probable that nearly every owner of a small lake or pond had wished he could make it a paradise for ducks, and he had found that ducks came each season in great numbers to the places where the food they loved was most abundant.

He saw that the ducks were the food the ducks want? he asked himself, and, being a boy of action, immediately got busy.

He gathered seeds from the water plants and experimented with them. Then he cultivated the plants and improved them. His constant experimenting, with his firsthand observation, finally yielded fruit. He found that every wild duck was very fond of the tender shoots and bulbs of the water plants, and he set out thousands of plants, which attracted the ducks in a great number. He cultivated the plants carefully, and then started shipping them to nearby clubs for transplanting, or planted them near his lake, so that he discovered that because of their handsome arrowweed and delicate white flowers they were much in demand for ornamental purposes.

While lying concealed one day watching the ducks feeding in one of his ponds, young Terrell was struck by the fact that certain kinds of ducks were feeding almost entirely on certain kinds of plants. He waded out in the pond when they had flown away, examined the plants, and came to the conclusion, the water ducks, like the mallards, teal and pintails, preferred the wild rice, while the canvasbacks, redheads, blue-bills and other diving or deep water ducks

# THINK — Mr. Motorist!

## See Me!

When you want a first class job of repairing on your Auto. Oldest man in point of service in the city and have always given good workmanship at moderate prices.

### Ford Repairing a Specialty

Remember I was the first Ford man in the city. I specialize on this work and carry a complete line of repairs. Let me do your next job or overhaul your car this winter.

### Stomach Germs Routed

One Dose of May's Wonderful Remedy Drives Them Out—Ends Torture.

Stomach poisons breed millions of germs that eat into your vitals, causing gas pressure, indigestion, constipation, torpid liver, auto-intoxication, yellow jaundice, gall stones, appendicitis, cancer and ulcers of the stomach and intestines, etc., etc. Thousands of sufferers have been restored by May's Wonderful Remedy, among them judges of the Supreme Court, congressmen, doctors, lawyers, bankers, ministers, nurses, farmers, mechanics—persons of every class—probably your own neighbors. Stomach troubles are due mostly to contaminated food.

May's Wonderful Remedy removes that poison, thoroughly cleanses the system, drives out the disease breeding germs, allays inflammation and ends suffering. Unlike any other remedy, May's Wonderful Remedy is non-toxic. One dose convinces. FREE book on Stomach Ailments. Write Geo. H. May, Mfg. Chemist, Chicago, or obtain a bottle of May's Wonderful Remedy from Otto's Pharmacy, or any reliable druggist who will return your money if it fails.

### Get Baby The "Right" Food

The baby's health depends on its food. Get a food nearest mother's milk. A food with proper nourishment. Such a food is Thompson's Food (Peptonized).

A scientific food containing all those elements essential to the growth and health of your baby. If your baby is deprived of mother's milk, don't delay but start at once on Thompson's Food (Peptonized) and you will be delighted with results. Ready for use by simply adding water.

We suggest that you try a 50c package with our guarantee of satisfaction.

"The west did it. The great big, steady, east west. The west that gives the east its bread and puts the most upon its table. The west won for Wilson. The west is coming into its own. The west is speaking. Hereafter, when a party writes its platform and picks its candidates, it will pay less attention to what and who will carry New York and more to what the west wants."—St. Paul Daily News.

### FEW CHIEF EXECUTIVES RICH

Washington left an estate valued at \$800,000; John Adams died recently, leaving about \$750,000; Jefferson died so poor that if Congress had not purchased his library at \$20,000 he would have been a pauper; Madison was frugal and left about \$150,000; Monroe died so poor that he was buried at the expense of his relatives; John Quincy Adams left about \$55,000; Jackson died worth about \$80,000; Van Buren left some \$400,000. It is said he did not draw his salary while in office, but at the expiration of his term of service drew the whole \$100,000, according to the New York Mail. Polk left an estate valued at \$150,000; Taylor had saved cash, but lost it in the army and died worth \$150,000; Tyler inherited a lady of wealth; Fillmore was always frugal and added to his savings by marrying a woman of wealth and was worth about \$200,000; Pierce's estate was valued at \$50,000; Buchanan left \$200,000; Lincoln about \$75,000 and Johnson \$50,000; Grant was wealthy, but lost his fortune in the Grant & Ward speculation; Hayes was always frugal, and added to his fortune while Garfield was only moderately well off; Harrison died worth \$250,000, while Cleveland's fortune was larger; McKinley died worth about \$1,000,000, while Roosevelt had a substantial competence; Wilson has royalties from his books, and his second wife is a woman of wealth.

### RUDOLPH

There will be a meeting by Rev. M. J. in the Swedish Lutheran church Thanksgiving day at 10 a. m. and Thanksgiving dinner at Eric Frieman's. All are welcome to attend.

Don't fail to attend the Thanksgiving service in the Moravian church next Sunday at 2:30 p. m. Be prepared to tell what you are especially thankful for this year. Everybody welcome.

Mr. and Mrs. Herman Lawrence are rejoicing over the arrival of a beautiful baby girl at their home on Friday last.

Mrs. Louie LeMay and Mr. and Mrs. DeWitt of Grand Rapids were Sunday visitors at the J. J. Rayone home.

Mr. and Mrs. Irvie Rayone were Grand Rapids visitors Tuesday.

Mrs. Thos. Keill of Grand Rapids visited at the K. J. Marceau home from Sunday noon till Monday noon.

Mr. and Mrs. A. J. Kuwaja drove to Stevens Point Saturday where they visited with relatives until Monday.

Miss Elsie Peterson of Fond du Lac is visiting at the home of her uncle, Peter Akoy.

The Rudolph hunters have all got back from deer hunting, each having killed a big deer. Dr. Jackson's deer weighed 210 pounds, Frank Root's weighing 191 pounds, while the rest of the party all got smaller deer.

Mr. and Mrs. K. J. Marceau drove to Grand Rapids Tuesday.

Mrs. Geo. W. Baker, Sr. and Miss Eleanor Newman of Grand Rapids spent Sunday at the Nick Ratelle home.

Mrs. Joe Kirkland of Grand Rapids spent Sunday at the J. J. Rayone home.

Anna McGregor is working at the Hotel hotel.

Nick Ratelle returned home last Thursday afternoon from Green Day.

Ruth Kinney departed Saturday noon for a three weeks vacation, which she will spend in Milwaukee and Nekeosa.

Anna Justeson is tending telephone during the absence of Miss Kinney.

Mr. Margeson and daughter Bessie returned from Grand Rapids Sunday at the Harriet Clark home.

Mr. and Mrs. Peter Deidrich of Grand Rapids spent Sunday at the home of the latter's sister, Mrs. Simon Joosten.

Mrs. Emil Hannusch and Mrs. F. S. Root and daughter Vera, spent Sunday with Mrs. Joe Marshall in Daney.

Mr. Hannusch and crew of carpenters will begin this week on the work of building the Suwanee Lumber Co.'s buildings.

Nick Ratelle took a load of hay to the Rapids Tuesday for his brother-in-law, George Baker.

R. E. Ogilvie has purchased of R. A. Keizer the Ferdinand Phillips farm consisting of 150 acres. The consideration was \$8,800.

Mr. and Mrs. Mark Joosten were shopping in Grand Rapids Tuesday.

WANTED.—House and lot in exchange for 60-acre farm. Call Telephone 1013.

### REASONS FOR BUTTER ADVANCE

Three broad-gauged guesses may be taken as the reason for the advance in butter prices. According to B. H. Hubbard of the College of Agriculture, University of Wisconsin, the demand for butter is increasing, and the supply is decreasing, due partly to the European war; and owing to dry pastures and higher prices for feeding stuffs, a slight decrease in production on dairy farms.

Added to these specific causes and a lesser output of cheese than ever before is the general fact of increased prices for food stuffs of all sorts, and it seldom happens that any given article of food will fail to follow, more or less, the price fluctuations of the mass.

"Under present conditions the farmer gets more than two-thirds of the total amount of money paid by the consumer for butter, and there is no positive indication that any speculation is taking advantage of the market to boost prices and reap profits. The advance may be charged to a combination of circumstances."

### NEW VARIETY CORN IS EARLIER

Wisconsin corn breeders have developed a new variety with which to "push the corn belt northward." According to reports from E. J. Delwiche, in charge of the northern branch stations of the College of Agriculture, the new early dent variety, known as Wisconsin No. 8, which has been developed under varied conditions of soil and climate. It is about ten days earlier in maturing than Wisconsin No. 8, which has heretofore been the most prominent variety for the regions of the state having short growing seasons.

"At the Spooner Station the Wisconsin No. 25 is yielding more than 75 bushels of shelled corn an acre," says Mr. Delwiche. "The corn was first sown on September 10, and September 11. The variety also did well at Cornish on a heavy silty loam soil. Reports from co-operating farmers throughout the north, who grew this variety on test plots, are nearly all favorable. As several hundred acres of Wisconsin No. 25 were planted during the past season, a considerable amount of good seed will probably be available. Names of growers will be supplied on request."

Mr. Delwiche says that this variety will do for either crib or silo. It grows from seven to nine feet high, is leafy, and not coarse in stalk. The ears are medium size and of a deep golden color. The kernels are deep yellow, and much harder than most dent varieties, although not flinty in character. Twelve to sixteen rows to the ear is the rule. The proportion of corn to cob averages about 3 to 1.

### THE HIGH COST OF LIVING

Whether or not an embargo on foodstuffs would decrease the cost of living in this country is a question, but it seems as if the problem is in the hands of Washington authorities and if they report to the president that an embargo will "put the prices down where they belong," it is altogether likely that Mr. Wilson will order the embargo insofar as his executive rights permit.

However, one might as well face the facts in the beginning. The present high prices are due primarily to the European war, and the curtailment of the production of foodstuffs in the European countries. It stands to reason that neither England, France, Germany, Russia nor Italy has produced a normal crop when the fields have had to be filled by women unfamiliar with the best methods of farming and unfitted physically to get the same results as men could.

The women of Europe have succeeded in taking the places of the men at the front, but it is obvious that they cannot carry on the work of each nation as well as it was carried on before the war. There is a certain amount of labor to be done in the world. A time of war not only fails to lessen that amount but increases it; for while the added burden of munition making is going on the soldier at the front and the wife, the widow, the child and the invalid at home must be fed.

Foreign countries have been bidding high for our foodstuffs, and our normal crop has been decreased, particularly the wheat crop, thru bad weather conditions. And while the people of this country naturally would like to see the European war end, the fact is that the European war has been a disaster to the world. The first duty of America is to Americans.

At the Spooner Station the Wisconsin No. 25 is yielding more than 75 bushels of shelled corn an acre," says Mr. Delwiche. "The corn was first sown on September 10, and September 11. The variety also did well at Cornish on a heavy silty loam soil. Reports from co-operating farmers throughout the north, who grew this variety on test plots, are nearly all favorable. As several hundred acres of Wisconsin No. 25 were planted during the past season, a considerable amount of good seed will probably be available. Names of growers will be supplied on request."

Mr. Delwiche says that this variety will do for either crib or silo. It grows from seven to nine feet high, is leafy, and not coarse in stalk. The ears are medium size and of a deep golden color. The kernels are deep yellow, and much harder than most dent varieties, although not flinty in character. Twelve to sixteen rows to the ear is the rule. The proportion of corn to cob averages about 3 to 1.

## LOCAL ITEMS

Mrs. Wm. Leacy of Alford was in the city shopping Wednesday.

Mrs. John Relman returned on Wednesday from a visit at Wausau.

Fred Bahori of the town of Sherry was a business visitor in the city on Wednesday.

Lewis Schroeder was called to Milwaukee the past week by the death of a relative.

Miss Fanny Barretto, one of the chief operators at the telephone office, was laid up several days last week on account of sickness.

Miss Laura Fordyce, who has been visiting Mr. and Mrs. Charles Natwick for several weeks past, returned last week to her home at Ilion.

Stevens Point Journal: It has been officially determined that the man who was killed on the Soo tracks at Prentice October 23, was not Bernard Mau, who left his home in the town of Carson, this county, a short time before the fatality occurred. It will be remembered that Mrs. Mau called at the Journal office to get a description of the dead man and later interviewed the officials. After leaving here Mrs. Mau went to Prentice where she interviewed members of the coroner's jury and others who had examined the body of the dead man. She showed them a photograph of her husband and the men she interviewed were convinced that he was not the man killed. With this Mrs. Mau was not satisfied and she finally had the body exhumed and examined. It was found that the body was not that of Bernard Mau and the woman having satisfied herself that the remains of her husband did not occupy the nameless grave at Prentice, returned to her home near Junction City.

Stevens Point Journal: John M. Konzelman, the McGill stock buyer, has caused papers to be served upon Elmer Carley of Ansonia in an action seeking \$2,000 damages as a result of a collision between Carley's automobile and Konzelman's horse and buggy on the McGill bridge, May 26, 1916.

Mr. Konzelman says that he was driving across the bridge when Mr. Carley ran into him and that both the horse and buggy were injured by the collision as was he himself. He alleges in his statement that he has since suffered great pain and was unable to attend to his business for three or four weeks after the accident. His attorney is Theodore Borg of Appleton.

John D. Yetter of Floodwood, Minn., was in our burg a few days last week.

Wm. Witt went to Milwaukee Saturday to attend the funeral of a relative.

Emil Hjerstedt returned home from Chicago last Thursday.

E. H. Munroe is deer hunting in Husk county.

Wilbur Ring returned home from Kenosha last week.

Miss Ella Yetter has gone to Oshkosh to work for the winter.

There will be Thanksgiving services at the Moravian church at 7:30 Thanksgiving evening. A 25¢ supper will be served after the sermon.

Mr. and Mrs. John Dholm and family are visiting in Chicago and Milwaukee this week.

Mr. and Mrs. C. Gussel and son Leslie spent last Friday at Stevens Point.

Mr. and Mrs. Jess Worden returned home from deer hunting Tuesday. They had one buck.

AN ALPHABETICAL ATROCITY

"An American aeroplane," asserted Adam arrogantly, "always ascends."

Admiring Adam, as an amateur always admires an authority among aeronauts, Anna acquiesced and acquiesced an American aeroplane, as Adam advised.

Arabella abandoned an antagonistic attitude, although angry at Anna's act.

Adam, annoyed at Arabella's antagonism, advocated an afternoon ascension.

Anna agreed.

Afternoon arrived, as also artists, amateurs, Anna and Arabella.

Assuming an animated attitude, Anna and Arabella attracted admiring attention as Anna's American aeroplane ascended.

Adam arrived as Arabella and Anna alighted.

"Adam," acknowledged Arabella afterward, "altho arrogant, always advises aright. American aeroplanes always ascend, and amateurs ardent."

Adam arrived as Arabella and Anna alighted.

Arabella abandoned an antagonistic attitude, although angry at Anna's act.

## DIRECTORY SENT FREE

A recent issue of "The Crusader," the monthly magazine of the Wisconsin Anti-Tuberculosis association, contains much information on the subject of tuberculosis which should be known by every intelligent citizen of the state. A limited supply of copies has been set aside for free distribution, so long as they last, to readers of this column who send their names and addresses to that association, University Extension Building, Milwaukee.

The frontispiece is a beautiful bit of art photography. It is a view of a sleeping porch on which a patient, taking the cure, is silhouetted against the glow of the setting sun shining across the Fox River. Several other full page illustrations are included which give in a glance some idea of the splendid beginning that has been made in this state to curb the ravages of consumption which is responsible for one in every eleven deaths. These include the state Sanatorium at Wales, the Convalescent Camp at Tomahawk Lake, the nine County Sanatoria, and Milwaukee's new "Preventorium," the first institution of this character established in Wisconsin.

A brief article entitled, "Some Things You Should Know If You Have Tuberculosis," sums up very concisely the advice that the most competent medical specialists in tuberculosis give their patients. Inasmuch as there are so many consumptives killed each year by wrong actions and bad advice of relatives and friends, every person who knows a victim of this disease should read and ponder this well.

Ignorance and misinformation kill so many! Knowledge saves lives and should be used more often. One who saves a life at the risk of his own is a hero. And yet the service of saving a life, when done with little personal trouble and at no personal risk, is of just as great value to the individual thus saved, and to his family. The above mentioned "Crusader" is a life-saver. Can you use one?

## BIRTHS

A daughter to Mr. and Mrs. Fred Henke, Monday, November 20.  
A daughter to Mr. and Mrs. Will Roberts.

A daughter to Mr. and Mrs. Wm. Sals, Saturday, November 18.  
An eleven and one-half pound boy to Mr. and Mrs. Will Rickman, on Monday, November 20.

Mrs. Wm. Kuter, Sr. of the town of Rudolph, was a pleasant caller at the office Wednesday. Hereafter Mrs. Kuter will keep posted on local events by reading the Tribune.

## NAME HOUGHEN CAPTAIN

Stevens Point Journal: At a meeting of the football men of the Normal held at the school Wednesday afternoon after school, Leslie H. Houghen of Grand Rapids was elected captain for the 1917 football team. There are sixteen first team men to receive sweaters this year and seven second team men who will receive jerseys. A vote was taken as to the color desired for the sweaters this year and resulted in favor of white. The color for the jerseys has not been decided and the color white is not assumed for the sweaters.

## THE LAWYER TELLS THE GOOD JUDGE ABOUT THE STUBBORN ONE

JUDGE, LOOK AT THAT FELLOW'S FACE—ALWAYS CHUCK FULL OF ORDINARY TOBACCO SEEMS SOME OF HIS FRIENDS WOULD TELL HIM ABOUT W.B. CUT.

I AM SURE HE WOULD APPRECIATE IT.

YOU'RE not sorry for gophers and monkeys with their faces all swelled out—they are built that way, pockets in their cheeks to hold stuff till it's feeding time. But you can't help feeling sorry for a man with a big wad of old kind of tobacco—he isn't even getting satisfaction. W.B. CUT is rich to be so full of satisfaction—g little chew, is right size, and it cuts out so much chewing and spitting.

Made by VETTER-DRUTCH COMPANY, 50 Union Square, New York City.

Special Fur Sale Thursday and Friday, Nov. 23 and 24, 1916, at the Ready-to-Wear Parlor. I. E. Wilcox.  
Mrs. H. A. Saeker of Wausau spent several days in the city last week visiting with friends and relatives.  
Miss Bernadette Schlatterer of Mosinee spent Sunday in the city with her mother, Mrs. L. M. Schlatterer.  
Miss Anna Wheeler is visiting her sister in Fond du Lac for a week or ten days, arriving down last Saturday.  
Harry Hagerstrom of Stevens Point spent several days in the city last week visiting his relatives and friends.  
Mrs. W. H. Lake and daughter Emma are guests at the home of her daughter, Mr. and Mrs. Ed Bodette, Jr.  
Mrs. Mary B. Vaughan of Pittsfield, a former resident of this city, has entered the Veteran's Home at Waupaca.  
K. A. Hansen, one of the solid farmers of the town of Grand Rapids, favored this office with a pleasant call last Friday.  
Oscar Louis Panter and Arthur Stokles departed on Monday for Glidden where they will spend several days deer hunting.  
Will Schroedel, assistant cashier at the Bank of Grand Rapids, has been confined to his home the past week with sickness.  
Mrs. James Dolan leaves this week for a visit with her mother, Mrs. Mary McKorcher, and sister, Mrs. I. O. Mills at Lancaster.  
Frank Lamberton has accepted a position with the Daly Ice and Coal company as collector, having started in on his work last week.  
Irv. Henry, Andy Lund and Ben Hager returned from the north woods on Saturday and each brought with him a fine deer that they had succeeded in killing.  
The Nash Bunch came down from Boulder Junction Saturday night after having been up in the deer country for a little over a week. They brought with them two deer, having failed to get their full allotment. They report having seen numerous deer, but there seemed to be very few bucks among the lot.

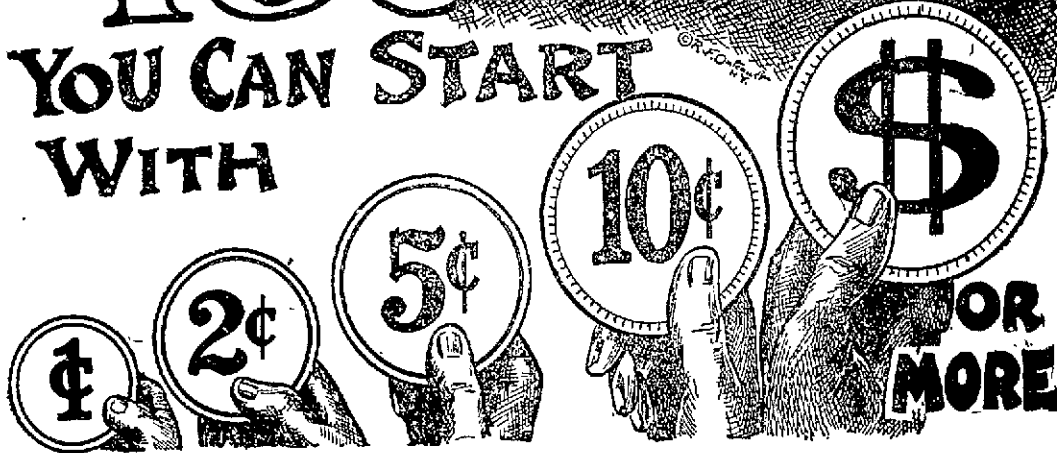

Charles Kruger spent several days in Chicago last week on business.  
—Mr. A. Steindler will be at the Ready-to-Wear Parlor Thursday and Friday, Nov. 23 and 24, with a complete line of furs and fur coats. I. E. Wilcox.  
Rev. L. E. Peckham of the town of Grand Rapids was among the pleasant callers at the Tribune office on Wednesday.  
Mr. and Mrs. A. F. Jones and Mr. and Mrs. D. J. Cerow were at Wausau on Friday where they attended a meeting of hotel keepers held in that city.  
Mesdames Ernest Kristofski and Geo. Smallbrook departed on Wednesday noon for Milwaukee to attend the funeral of their uncle, William Demken.  
The Green Bay Bridge Club was entertained by Mrs. J. J. Canning on Friday evening and the honors of the occasion were carried off by Mrs. W. C. McGlynn.  
Mr. and Mrs. Robert Skeel, who have been spending the past summer at Cranmore, leave today for Wausau where they will live during the ensuing winter.  
J. L. Reinhart and family are moving into their beautiful new home this week, which was recently completed on the corner of Eighth and Baker streets.  
Miss Aulita Holmlund, who is attending the Normal at Stevens Point, spent Saturday and Sunday with her parents, Mr. and Mrs. John Holmlund, in this city.  
Mr. and Mrs. Matt Kandy are packing their household goods preparatory to moving to Ripon, where Mr. Kandy has accepted a position with the Haas Brewing Co.  
At the meeting of the county board in Lincoln county last week it was decided to buy two automobiles, one for the use of the sheriff and one for the highway commissioner.  
John Akey of Merrill, owner of the truck bear "Queenie," who is at present showing in the south, intends to go to South America with "Queenie." One of the stunts done by this bear is to drive an auto thru the crowded streets.  
Jensen & Ebbe received a large shipment of Ford cars last Friday which they are storing in their new warehouse which they recently completed on the west side. The new building will accommodate about 30 cars.  
E. F. Deyo, who has operated the hotel at Port Edwards during the past fifteen years, has gone out of the hotel business and will probably move to this city to make his home. C. M. Myers has taken charge of the hotel down there.  
W. H. Upham Camp, Sons of Veterans, organized at Marshfield less than a year ago, has been disbanded. The camp was organized in March last year with a membership of 59. Owing to lack of interest the charter was surrendered.  
Stevens Point Gazette: Mrs. Mary Pahl of Grand Rapids visited friends in this city last Friday night while enroute to Appleton on a business trip. Mrs. Pahl is better remembered here as Mrs. John McKinley, a former resident of Stockton and Buena Vista.  
The jump that the old cow made when she jumped over the moon isn't a circumstance to the jump made by beef and lamb one day last week, when it took a flyer of a cent to a cent and a half. If the present state of affairs continue we can give those old nursery rhymes cards and spades and still beat them to the wire. Of course, so long as we are breaking a record, we don't mind it so much.

The various societies of the Scandinavian Moravian church will hold their annual Norwegian supper in the G. A. R. hall this coming Saturday. Patrons will have their choice of lutefsk or chicken-pie.  
—Bring your fur repair work to the Ready-to-Wear Parlor Thursday and Friday, Nov. 23 and 24, 1916. Mr. Steindler will gladly estimate the price of work. I. E. Wilcox.  
The Masons held a dancing and card party at their hall on Friday evening at which there was a large attendance and a good time. They expect to have regular events of this sort in the future. At the dance Friday night a number of the old-fashioned dances were indulged in.  
John Bell, Jr., who has been at Dexterville during the past summer where he has been overseeing matters on the Frank Hiles farm, spent Sunday in this city visiting his family. Mr. Bell expects to finish his work at Dexterville this week and return to this city for the winter.  
Over in Waushara county the county board has abolished the training school, their excuse being that the calls for money were so continuous and persistent that it was costing more than the school benefited the county. Sort of another case of killing the goose that laid the golden egg.  
F. G. Mengel, district engineer in charge of this section of the state, was at Stevens Point on Friday where he appeared before the county board and gave them a talk on road matters in general. The Portage county supervisors were considering the feasibility of changing to the trunk line system, a plan that is strongly advocated by all of the big road builders these days.  
Big old "snapping" turtles, which are found in the river and sloughs, are being caught and marketed this fall. They are shipped by express to Philadelphia, where they bring eight cents a pound alive, and when they are dead, a paying proposition. Last week over 700 pounds were shipped in two days from Richland Center. The meat is nice and white, is good fried, and when made into soup makes a fine dish.  
Four of our local churches will unite in a union Thanksgiving service in the Baptist church on Thanksgiving morning at 10:30 o'clock. The churches uniting in this service will be the Methodist, Scandinavian Moravian, Baptist and Congregational. The pastors of these churches will take part in the service. The sermon will be preached by the Rev. H. B. Johnson. As is usual at these services the offering will be given to the army and navy fund.  
Will Hurley, who has been in the northern part of the state hunting deer since the beginning of the season, returned on Saturday. Mr. Hurley reports that a number of deer were killed where he was hunting. He says this year because they had not kept within the law, and that the game warden seemed to be more active his year than ever before. Nearly every man who came out of the woods was compelled to allow the warden to go thru his luggage, something that was never before done, and the result was that several were caught with the goods on them and had to cough up a substantial fine in order to continue on their way home. Mr. Hurley was unable to hunt very much while he was up in the woods, owing to an injury to his eye which he sustained while splitting wood, being struck in the eye by a small piece of wood that caused a very painful injury.

Moulton—Bedtime Stories.  
Wiggins—Story of the Spring.  
Wilkins—Humble Romance.  
KLUCK IS DISCHARGED  
Stevens Point Journal: Sergeant Felix V. Kluck has been honorably discharged from the United States army for physical disabilities incurred while in the service. He is to receive a permanent pension of \$55.03 a month.  
The discharge papers which he recently received are dated Oct. 7. His disabilities resulted from a 500-foot fall from a disabled airplane while on Mexican border scout duty with the army in the spring of last summer.  
Serg. Kluck complains of a stiffness of his right arm but says the condition is slowly improving. The fractures of his hip have healed entirely, he says. Apart from the stiff arm he is in good health.  
Kluck's enlistment was in the Second company, C. A. C., Ft. Hancock, U. S. A. He had been transferred from the coast artillery service to the aviation corps.  
Mr. Kluck has no definite plans for the future, but expects to return home for the present. His father is Frank Kluck, the Little Waupun merchant.

TWO WAYS OF  
STORING BATTERIES  
—To the car owner who contemplates storing his car during the winter, the problem of caring for his storage battery presents itself. It is not enough to merely take the battery off the car and put it in a place where it cannot freeze, for even when discharging itself, if therefore, the owner does not give his battery definite attention during the winter, he is likely to find it dead when he comes to use it in the spring.  
Storing the storage battery at the battery service station is by far the best solution to the storage problem. In the Willard Service Stations, two kinds of storage are offered to the car owner, namely, wet storage and dry storage.  
Leaving the battery in wet storage means simply that the car owner leaves his battery in charge of the battery experts who see that it is fully charged and kept in that condition, that it is filled with distilled water at regular periods and that the best of care is taken of it during the winter.  
Dry storage, however, is not entirely satisfactory. The Willard Storage Battery Company does not at all recommend it for batteries that are over a year old or that have seen hard service. The reason for this is that when the battery is in wet storage, natural deterioration is all the time going on, just as it is when the battery is on the car. In the ordinary course of events the insulation in a battery is going to break down sooner or later, and this might happen during the period that the battery is in wet storage. The insulation then would have to be entirely renewed to make the battery serviceable, and even were this done there would be some question as to whether the plates would be in good condition for another season's service.  
Dry storage is by far the more satisfactory means of storing. The battery is completely disassembled and the elements removed from the cells, cured and put in a dry place, to be re-assembled in the spring. Obviously, this is the one form of storage in which the wear on the battery is absolutely stopped. If for no other reason, this should recommend it to the automobile owner.  
In leaving down the battery the expert will be able to tell its condition without a doubt; he can determine whether it is fit for service without further attention or repairs, if any, are necessary.  
If the battery is stored dry, it is fitted with new insulation in the spring and this insulation insures the owner satisfactory service when the battery is again put into commission.  
STAFF'S ELECTRIC SHOP,  
Official Service Station—East Side.  
A Detroit paper says of Henry Ford: "He has a business organization and a plant that \$200,000,000 would not buy. He has \$45,000,000 cash in banks. He has over \$30,000,000 worth of raw material on hand. He has many millions of dollars worth in titles of the country. He turns out 2,500 automobiles a day and has a personal net income of over \$100,000 a day."

# JOIN OUR CHRISTMAS BANKING CLUB and HAVE MONEY YOU CAN START NOW-START YOU CAN START WITH

### PLAN OF THE CLUB

The Plan Is Simple: You begin with a certain amount, 1c, 2c, 5c, or 10c, and increase your deposit the same amount each week. Or, you can begin with a certain amount, 50c, \$1.00, \$5.00, or any amount, and deposit the same amount each week.

### HOW TO JOIN

Look at the different Clubs in table below and select the one you wish to join, the 1c, 2c, 5c, 10c, 50c, \$1.00, \$5.00, or any of the clubs; then come to our Bank with the first weekly payment. We will make you a member of the Club and give you a Christmas Banking Club Book showing the Club you have joined.

EVERYBODY CAN JOIN—Men and Women, Boys and Girls, Little Children, the Baby

You can take out memberships for your family and your friends. An employer can take out memberships for his employees. We will welcome everyone.

### WHAT THE DIFFERENT CLUBS WILL PAY YOU

1c Club	2c Club	5c Club	10c Club	50c Club	\$1.00 Club	\$5.00 Club	X Club

YOU CAN BEGIN WITH THE LARGEST PAYMENT FIRST AND DECREASE YOUR PAYMENTS EACH WEEK

### THE REASONS FOR THE CLUB

To provide a way for those of moderate and even small means to bank their money.  
To teach "the saving habit" to those who have never learned it.  
It makes your pennies, nickels and dimes, often foolishly spent grow into dollars; dollars grow into a fortune. Start your fortune today.  
To give you a Bank connection and show you how our Bank can be of service to you.

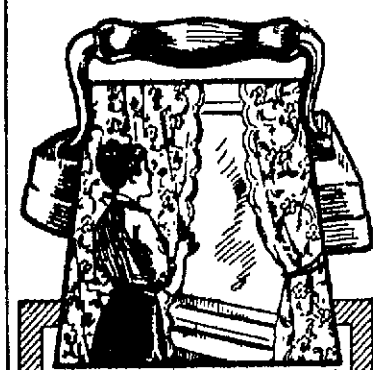

### FOR OLD AND YOUNG

The sensible thing for all parents to do is to join our Christmas Banking Club and also put every member of their family into it. This will teach them the value of money and how to bank and HAVE MONEY. Maybe this little start you give them now may some day set them up in business or buy them a home.

How often have you wished that your parents had taught you early the value of banking your money. You would be well-off today. Don't make the same mistake with YOUR children.

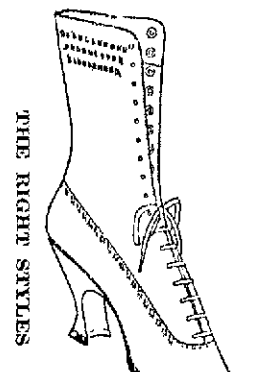

WE PAY 3 PER CENT INTEREST IN OUR CHRISTMAS BANKING CLUB

—Bring your fur repair work to the Ready-to-Wear Parlor Thursday and Friday, Nov. 23 and 24, 1916. Mr. Steindler will gladly estimate the price of work. I. E. Wilcox.

The Masons held a dancing and card party at their hall on Friday evening at which there was a large attendance and a good time. They expect to have regular events of this sort in the future. At the dance Friday night a number of the old-fashioned dances were indulged in.

John Bell, Jr., who has been at Dexterville during the past summer where he has been overseeing matters on the Frank Hiles farm, spent Sunday in this city visiting his family. Mr. Bell expects to finish his work at Dexterville this week and return to this city for the winter.

Over in Wausau county the county board has abolished the training school, their excuse being that the calls for money were so continuous and persistent that it was costing more than the school benefited the county. Sort of another case of killing the goose that laid the golden egg.

F. G. Mengel, district engineer in charge of this section of the state, was at Stevens Point on Friday where he appeared before the county board and gave them a talk on road matters in general. The Portage county supervisors were considering the feasibility of changing to the trunk line system, a plan that is strongly advocated by all of the big road builders these days.

Big old "snapping" turtles, which are found in the river and sloughs, are being caught and marketed this fall. They are shipped by express to Philadelphia, where they bring eight cents a pound alive, and the hunting of them is a paying proposition. Last week over 700 pounds were shipped in two days from Richland Center. The meat is nice and white, is good fried, and when made into soup makes a fine dish.

Four of our local churches will unite in a union Thanksgiving service at Stevens Point on Thanksgiving morning at 10:30 o'clock. The churches uniting in this service will be the Methodist, Scandinavian Moravian, Baptist and Congregational. The pastors of these churches will take part in the service. The sermon will be preached by the Rev. H. B. Johnson. As is usual at these services the offering will be given to some worthy undenominational cause. Make it a point to be present.

Will Hurley, who has been in the northern part of the state hunting deer since the beginning of the season, returned on Saturday. Mr. Hurley reports that a number up in the neighborhood where he was had to pay fines this year because they had not kept within the law, and that the game warden seemed to be more active his year than ever before. Nearly every man who came out of the woods was compelled to allow the warden to go thru his luggage, something that was never before done, and the result was that several were caught with the goods on them and had to cough up a substantial fine in order to continue on their way home. Mr. Hurley was unable to hunt very much while he was up in the woods, owing to an injury to his eye which he sustained while splitting wood, being struck in the eye by a small piece of wood that caused a very painful injury.

**KLUCK IS DISCHARGED**

Stevens Point Journal: Sergeant Fred Y. Kluck has been honorably discharged from the United States army for physical disabilities incurred while in the service. He is to receive a permanent pension of \$55.00 a month.

The discharge papers which he recently received are dated Oct. 7. His disabilities resulted from a 500-foot fall from a disabled airplane while on American border scout duty with the army aviation corps last summer. Serg. Kluck complains of a stiffness of his right arm but says the condition is slowly improving. The fractures of his hip have healed entirely, he says. Apart from the stiff arm he is in good health.

Mr. Kluck's enlistment was in the second company, C. A. C. Ft. Hancock Regiment, U. S. A. He had been transferred from the coast artillery service to the aviation corps. Mr. Kluck has no definite plans for the future, but expects to remain at home for the present. His father is Frank Kluck, the Little Waupun merchant.

**ADVERTISED MAIL**

List of advertised mail at the post-office in Grand Rapids, Wisconsin, November 21, 1916:

Ladies—Mrs. J. Gussman; Mrs. Alma Warner; Mrs. L. R. Weber; Gentlemen—Mr. Burt Conklin; Mr. Frank Patterson.

Merrill Herald: Thursday evening at 7 o'clock, M. H. Brieseman of Milwaukee, accidentally shot himself through the left knee, while in a hunting camp about five miles west of Grandfather. He was brought to this city by Dr. Kelly and is being treated at the home of Mrs. Theta Mead, the trained nurse, on Center street. It is thought that he will be able to be taken to Milwaukee this evening.

The fact that care and skill are necessary to do up lace curtains without tearing or disfiguring is the best reason why you should let us launder yours. We return them to you just like new and save you bother and money.

**"THANKSGIVING"**

Few occasions are anticipated with a keener sense of pleasure than this one big day. Turkey is associated with Thanksgiving as is firecrackers with July 4th. With this we are reminded of the Roaster, Carver, Cake Tin, Stew Pan, Nut Cracks and Soup Ladles, all of which you can obtain at our store in various styles and sizes.

**Nash Hardware Co.**

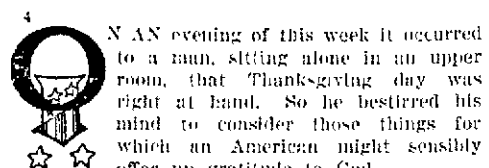

# THANKSGIVING

**G**OD be merciful unto us, and bless us; and cause his face to shine upon us; Selah. That thy way may be known upon Earth, thy saving health among all nations. Let the people praise Thee, O God; let all the people praise Thee. Then shall the Earth yield her increase; and God, even our own God, shall bless us. God shall bless us; and all the ends of the Earth shall fear him.

From the 67th Psalm.

## PRAISE HIM for This Most Precious Gift

AN evening of this week it occurred to a man, sitting alone in an upper room, that Thanksgiving day was right at hand. So he bestowed his mind to consider those things for which an American might sensibly offer up gratitude to God.

He reflected that across the Atlantic millions of human beings were at that very moment engaged in the crowded task of fitting other human beings with every invention which ingenuity and skill could bring forth from the laboratories of science and the workshops of industry.

In other lands at that very moment tens of thousands upon tens of thousands of helpless folk—feeble, aged men and women, mothers with babes clinging convulsively to their breasts, little children sobbing in terror, a vast army of the innocent and the anguished—were suffering the excruciating pain of hunger, and of despair as they fled from their wretched hovels and burning villages, escaping from the pitiless cruelty of savage men only to be down to suffer and die under the pitiless skies of God in the winter and the bitter storms.

At that very moment most dreadful war had laid half the world in the blackness of its darkness and from that horrid cloud rained destruction upon unhappy Europe—upon her ancient capitals, upon her pleasant cities, upon her villages, her fields, her temples, her treasures of art, upon all the accumulations of a thousand years of genius, of learning, of industry, of skill and of patient advancement of the happiness and the civilization of the race of man.

So he that considered all this wickedness that was being done under the sun, this drunken dance of death and hell above the field corpses and the multitudinous graves, this awful nightmare of indescribable war and wrath, said in the bitterness of his heart that no God ruled over such a mad world and there was no thanksgiving due to the Giver of Gifts that were not good, but everyone altogether evil.

And when the man had made an end of his thinking, he went and stood in a window and looked out upon the evening, because it was fair to see.

He saw in vision at that instant the vastness of the republic and the multitude of the good and happy folk who live under the shelter of its strength. He reflected how brief a time had thus magnified the works of our pioneer fathers and our pioneer mothers, those brave and simple men and women whose names should never be mentioned with anything but profound gratitude.

And to this American, glad with a great pride in the deeds of his people and the story of his country, and grateful to the Goodness which has guided and sheltered his fathers and his folk, lifted up his eyes to the night, to the quiet stars, to the brooding immensity above, and said in his heart:

"Thank God that I am an American!"

And, citizens, that is the one outstanding, splendid fact for which each one of us should soberly and most gratefully thank God on Thanksgiving day this year.

The finest thing you possess or ever can possess is just your American citizenship. It is neither necessary nor becoming, on this day or on any other day, to cheapen this birthright of ours by long and spandangle declamation.

But it is highly becoming on this Thanksgiving day to feel a deep gratitude and a manly pride in this heritage.

**WHERE THEY CALL HIM "CHARLIE."**

Charles M. Schwab, the Bethlehem steel king, is probably the most beloved "boss" in America. His men say there would be no strikes if others were like him. The American Magazine prints an article about him in which this occurs:

"They call him 'Charlie' at Homestead; he is 'Charlie' when he goes back there now to visit the 'boys.' Those who were there in the old days still know him by name, and just how long they have been on the job. When he went down to Homestead to say goodbye after resigning as president of the Carnegie Steel company, five thousand

men turned out in a body to wish him good luck. 'God bless you, Charlie!' Here's good luck to you, Charlie!' they shouted.

"Do I know him well?" said one grizzled employee at Homestead. "Is it Charlie Schwab you mean? Sure, don't I mind the first day he came here? Ah, didn't I work with him for years? Well, boy, what you, Not for him, Shure. I helped out the first piece of steel that ever went out of this mill. There isn't a man here that didn't give his good will to Charlie Schwab. There'd be no strikes in America if every boss was like him. The first day he come I says to him, says I, 'I have you a nut?' 'I have four,' says he, 'and you're well-

**HOW BRITISH ARMY GETS ITS MAIL.**

The British army prides themselves on the efficiency of their transport of both men and mails. One of the biggest armies ever raised in any country has been conveyed over the sea without the loss of a single unit, and a prodigious amount of mail matter is handled with similar effectiveness.

The army postal arrangements, which are on a vast scale, are working admirably. Letters sent from England to the expeditionary force in France take three days to reach men in billets and four days for soldiers in the trenches.

And so we finally believe you do feel. We all hear it repeated that patriotism is a thing of the past; that our people have become cosmopolitanized; that the masses have no deep-rooted loyalty to the country; that our rich men put dollars above the obligations of their citizenship; that our poor folk care little for the ideals of free government; that we Americans are decadent in the virtues and values which marked our fathers.

That is not true.

If there be any power in the world which plots war against us, Americans and promises itself victory over us on the assumption of our decadence in loyalty, that power will find how terrible was its mistake when our country calls her sons to battle in her defense.

We have, it is true, in our capacity as a collective people, left undone things that should have been done and done things which should have been left undone; and there is more truth than there should be in much that is jeeringly said by those who hate us.

We acknowledge that much of our politics is founded on expediency.

We see, here and there, painful evidence of corruption among lawmakers and even among the judges, who should know only justice and integrity.

We see rich men who do betray their country and foul their hands and soil their souls with most infamous dealings and most shameful profits.

We see Americans who do put the dollar above every consideration of right and duty, above the claims of our common humanity.

But while these things are true, it is true also that the heart and conscience of the American people, take them as a nation, are sound and sane and wholesome.

The blood of our fathers still runs in the veins of their sons. The spirit of the nation may indeed seem to shudder in the soft bed of long-enjoyed peace and security. But let war come against the land and no man need doubt that that spirit will spring up instantly awake.

We can rightfully be grateful that it has fallen to our happy lot to live in this most wonderful of all ages and to be citizens of this most wonderful of all the nations.

Let your hearts swell with just pride as you contemplate your country, so august, so splendid, so renowned in the earth.

Look upon your flag as it streams its bright folds above your heads with proud and loving eyes. Remember how honorable is its story, and forget not how many thousands of brave and good men died that it might wave your, the ensign of a free people.

Tell to your children the story of their forefathers, of those men and women who, amid the wilderness and forests that stood where now stand mighty cities and stretch cultivated farms, crested with hardships and endurance and most heroic faith and valor, the noble edifice of our republican liberties.

Speak to them of Dunke Hill and Valley Forge and Saratoga and Yorktown, and of the great Declaration—that most famous Charter of Human Freedom.

Tell them to thank God for their fathers' and mothers' hardihood and courage, for the wars they fought, for the victories they won.

Tell them to salute their flag with high and proud hearts.

Tell them to thank God this Thanksgiving day that they are Americans.

And then do you soberly, gratefully, proudly thank God yourself that you are an American.

Oh, dear and mighty motherland, what better gift or more to be desired could God give than to be born and to die, strange Daughter of Liberty, between thy shining feet!—From the Chicago American.

**U. S. TROOPS MAY USE CACTUS FOR WATER**

In the pursuit of Villa and his bandits through the arid regions of northern Mexico the United States troops traversed a region whose only vegetation is the barbed and forbidding cactus. To any but a cowboy or a trained plainsman of the Southwest, inhabitants themselves of the "cactus belt," this plant seemingly has no more value than the veriest weed, but it may well be that it may prove of great value to the troops in the absence of water, fodder, or even food for human beings.

In the punitive expedition there are many cowpunchers of the "cactus belt" serving as scouts, and in the cowboy and the Indian of the Southwest the lowly cactus has its greatest admirer, for they know what a game struggle for life this plant has to make against an unyielding desert soil. Even their ponies and cattle and the poor beasts of the desert know of these uses of the cactus for water and fodder, says the New York Herald.

There are some thousand varieties of this monstrous vegetable family, not counting the 300 varieties of the agave, or century plant—incorrectly included by many—in northern Mexico. The varieties of the yucca palm and all other forms of vegetation known to the arid region have the same faculty of sucking up from the soil every drop of the all too little moisture in it and storing it up in their tough and leathery leaves and roots.

Of the many varieties perhaps the most remarkable is that member of the family known to those schooled in desert craft as the "water barrel." This plant is shaped somewhat like a beer keg and is about the same size. Through all the years of its growth it has been sopping up what moisture the parched earth contained and retaining it. It is the sole reliance of desert dwellers in times of drought, and the troops, far from water holes and with water scarce, may yet be obliged to drink from it.

The "water barrel" is tapped by slicing off the top with a sword or machete and pouring the pulp until the water contained in it wells up into

the saucer thus formed. The pulp itself is pure and the water stored in it is likewise pure and refreshing.

Not all the water-bearing cacti are as gracious to famishing man, however, as the "water barrel." For most of them have produced themselves against the maraudings of those who would drink and live by imparting a bitter taste to the water they contain. The "boyote" especially, which abounds in the plains and deserts of Arizona, has a trick of discouraging depredations upon it, for its plump and juicy pulp secretes a bitter and poisonous juice.

In the last few years scientists have interested themselves in the study of the cactus for its possibilities as food, fodder and economic by-products. Dr. Leon B. Landrum, foremost in the study of this desert plant, several years ago conducted extensive experiments in Los Angeles to ascertain the value of the thornless cactus as an article of food for human beings. In an effort to prove his contention that it contains food properties sufficient to enable a man to work 18 hours a day, he had his two secretaries for two weeks lived on a daily diet of the leaves and fruit of the cactus, the former being served green or fried and the latter either raw or cooked. While the "cactus squad" survived the experience and professor to have enjoyed their novel diet, it is a fact that the cactus never has attained the popularity of a diet wagon.

In the whole vegetable kingdom probably there is not another plant family having so many differentiations of form as the cacti. For it is possible to find among them species that crawl and creep like vines, other than stand erect in a single unending stalk, like a green living monument of the desert; still others that are rooted to the spot, with their highest growth close to the ground and bearing almost no resemblance to usual forms of vegetation, and others, again, that branch out in thick unblooming branches.

come to him," he says. "Thanks!" says I. "What's your name?" "It's Schwab," says he, "Charlie Schwab!" . . . An' faith, he'd give me a match today as quick as he was after givin' it to me then."

## The Governor's Dilemma

By HAROLD CARTER

(Copyright, 1916, by W. G. Chapman.)

The governor was not playing the game as it should be played. That much was common talk at the capitol. It was all very well for him to take up an attitude of opposition to Boss Lloyd, but why had he run for governor under Lloyd's auspices? He must have known Lloyd was not giving away something for nothing.

There were some who justified the governor in claiming that a man cannot get into political life at all unless he is willing to accept some shady backing. But Governor Peters had swung round the minute he took the oath of office, announced that he meant to be the "People's Governor," and fought Lloyd tooth and nail, and fought him to a standstill.

Peters had been Boss Lloyd's lawyer in the old days. He knew the secret tragedy of his life. Peters' wife had left him a few years after their marriage, taking with her their only child, a boy. Lloyd, with all his influence, had never heard of her. Again, had never set eyes on her since that day. Peters had still been trying to discover her when Lloyd nominated him for office.

Peters had been a very quiet man. Few knew him; it was not till the papers were full of the life story of the new governor that it was known he was a married man, with a son at the State university. Lloyd, in particular, had not known. When he knew he set to work to get Peters in leading strings. And he had him. He scouted as he walked up the hill toward the executive offices. He did not wince when Governor Peters kept him waiting half an hour while he chatted with an old negro nurse, though other men would not have kept him waiting at all, and would have broken off any other interview immediately.

At last Lloyd was admitted into the governor's office. He sat down, triumph upon his face. Peters looked at him inquiringly. "Well, sir?" he asked.

"It ain't often I come here now, Mr. Peters," Lloyd began.

"Often enough for my requirements," answered the governor.

"Your requirements? Good Lord," said the boss, breathing hard. "Ain't

you got to have the boy arrested?"

"What?" shouted Lloyd. "I'm going to send him to jail, and the news is going to be front-page on every paper in the state."

"I don't think so," returned Peters quietly. "I have no son."

"Say, that's something new, ain't it?"

"Not at all," said the governor quietly. "He's only an adopted son. His father wanted him, but, having found him, I thought it best to let him grow up unspoiled. However, it seems to be in the blood, and I want my mind of him. He's yours, Lloyd."

**DIED BLIND AND IN POVERTY**

Inventor of Steam Foghorn an Example of the Ingratitude of the World.

The man who invented and installed the first steam foghorn died blind and in poverty despite his varied attainments and achievements in widely different fields. He was John Foulis, a Scotchman, who came to St. John, N. B., in the early years of the last century.

An interesting description of this versatile Scot is given in a paper read before the St. John Historical society by William Murdoch, C. E. Murdoch says of Foulis:

"He was a nephew of the brothers Robert and Andrew Foulis of Glasgow, painters and publishers, whose productions were the admiration of all their contemporaries, and whose edition of Horace, published in 1744, was hung up sheet by sheet, in Glasgow, and a reward offered for the discovery of a single error."

"This action of an intelligent breed was a graduate of Glasgow university. After various experiences when a young man, even to serving as surgeon on a whaling ship, he finally settled in St. John and became a land surveyor, artist, analytical chemist and a civil and mechanical engineer. His survey of the River St. John is still in vogue in the Crown land office of this province. His chemical knowledge ranged from analyzing ores to making his own whisky when overtaken by adversity."

"While operating as a mechanical engineer and owning a foundry he engaged the first steam ferryboat to cross St. John harbor, besides the first steam craft to ply the St. John river. Later on when Mr. Foulis was the engineer of the light and signal service of the government of New Brunswick, his principal charge being Partridge Island (at the harbor's entrance), whereon was an automatic fog bell, he proposed a steam whistle, steam whistles being then new to the world."

"Later on his suggestion was acted upon. There was no patent law then and though in his old age, blind and poor, he was given no compensation, and the inventor of the foghorn died in poverty."

**Suspended Animation.**

It has been determined that the fluids of insect bodies, for instance, freeze at 41 degrees Fahrenheit, any vital function becoming impossible at this temperature. At temperatures between this point and the temperature at which death will occur, a strange condition of suspended animation exists, the organism being, as it were, between life and death. In such a state the vital functions stop work, and as there is no activity in the body, no food is required. Animals placed in this state are readily restored by the gradual rise in temperature. This condition can be compared with that of a clock with stopped pendulum, the mechanism of which could be at any moment started again by a slight impulse given to the pendulum.

**The Reason.**

"Why are Indians more stoical in the face of death than white men?"

"That's easy. Indians are accustomed to dying."

**Country With a Future.**

Americans frequently fail to appreciate the size of Australia and the number of its people. This great continent has an area of 1,418,320 square miles within the tropical zone, and 1,825,331 square miles within the temperate zone. It has 5,000,000 people, almost wholly of British origin.

**Poverty and Disease.**

Investigations into the working and living conditions of the 30,000,000 wage-earners of the United States have revealed many things which are deplorable, especially among the unskilled low-paid group of workers. In spite of recent improvement in many industrial establishments the fight against unsanitary conditions is still an uphill one. Recent sanitary surveys show that the elimination of health hazards from industry is not a thing to be expected in the near future.

**Saved Off Sermon.**

A fool always boasts of what he is going to do, but an old hen always lays the egg before she cackles.—Llanapols Star.

his name to a bit of worthless paper, to buy her jewelry. You had the matter hushed up, but it's known. And there are the witnesses who'll swear to it. I tell you, governor, you can choose right now between signing that bill and saving your son."

Governor Peters drummed his hands on the desk. "Is that all?" he asked quietly, when Lloyd had finished.

"Well, ain't it enough?"

"You confess to having trapped him? You have been spying on the boy, turning him on to ruin me?" That woman, Sadie De Lee, is one of your people. Everybody knows who she is and what she has been. Everyone knows she was paid by you. How will that look?"

"Look?" snorted Lloyd. "Why, I suppose people would say, 'That's a smart trick Boss Lloyd pulled off on the governor.' But they won't get a chance to say it, because you'll turn down that bill."

Very deliberately Governor Peters stretched out his hand and took a document from his desk. With steady fingers he wrote his name at the bottom. "There's your answer, Mr. Lloyd," he said.

Lloyd sprang to his feet, his face white. "You—you've done it," he stammered. "All right. You'll see what mercy that kid will get. That's your last word, is it?"

"No," answered Peters. He rang a bell, and his secretary, a spectacled young fellow with sandy hair, came in. "Johnson," said the governor, "you heard all that?"

"Every word," replied the other.

"Have it prepared for the press exactly as it occurred, and explain why we used the dictaphone."

Boss Lloyd laughed contemptuously. "That won't go," he retorted. "I guess the people will think the laughs are on you, not me. A governor turned policeman and using a dictaphone to trap a caller! Maybe someone's used the dictaphone on you."

"Perhaps," said Peters. "Are you going to have the boy arrested?"

"What?" shouted Lloyd. "I'm going to send him to jail, and the news is going to be front-page on every paper in the state."

"I don't think so," returned Peters quietly. "I have no son."

"Say, that's something new, ain't it?"

"Not at all," said the governor quietly. "He's only an adopted son. His father wanted him, but, having found him, I thought it best to let him grow up unspoiled. However, it seems to be in the blood, and I want my mind of him. He's yours, Lloyd."

**FELT LIKELY TO BE POPULAR**

Indications That Velvet Has About Had Its Day of Popularity—Russian and Arabian Suggestions Mark Headgear—Bullion Ornamentation Leads.

New York.—At least, there is this to be said in regard to the fashionable press: It is the simplest that the milliners have demanded in several seasons. That, rather, the success of them that have governed millinery during the last few years were difficult beyond measure to achieve.

We have gone backward further than usual this season for an inspiration for new fashions, and the artistry and variety of the centuries that reached up from the Norman conquest to the days of Catherine de Medici have been overhauled to make an American costume and to France, American dollars.

Turning to Fate Predicted.

It is highly probable that we will wear more felt as the season advances than we thought was advisable at the beginning of the season. Of course, velvet stands as the first choice, but there are thousands who are wearied already of this fabric which sweeps over the continent with the thickness and pertinacity of a plague of locusts as soon as August reaches its maximum heat. At any rate, these sweeping felt hats of the musketeers are a relief from the ordinary velvet hats.

This hat is quite exclusive. It is like a tilted saucer. The top surface is in one piece, rising a bit in the middle. The brim leaves the head entirely open; it passes the crown. The color is peacock blue, the fabric is thick satin, the ornamentation consists of peacock eyes laid flat on the satin. But there is the really odd touch, very oriental: Beneath the upturned brim at the back there extends a piece of satin folded like a turban that reaches almost to the ears and disappears there. Holding it in place and reaching across the entire back of the head is a conspicuous barette of white and ruby crystals. Here is the Persian touch, for true, and if it sounds garish to you, wait until you see it on the right woman. It makes another hat in the afternoon seem commonplace.

**Hats on Eastern Lines.**

There are a few high and pointed velvet and satin hats that have been copied from native Russian costume, the Arabian suggestions made by Bakst. These shapes rest squarely on the head, showing not a flicker of hair except over the ears and at the extreme back, and the brim reaches out and up, coming to four points well above the crown.

An interesting description of this versatile Scot is given in a paper read before the St. John Historical society by William Murdoch, C. E. Murdoch says of Foulis:

"He was a nephew of the brothers Robert and Andrew Foulis of Glasgow, painters and publishers, whose productions were the admiration of all their contemporaries, and whose edition of Horace, published in 1744, was hung up sheet by sheet, in Glasgow, and a reward offered for the discovery of a single error."

"This action of an intelligent breed was a graduate of Glasgow university. After various experiences when a young man, even to serving as surgeon on a whaling ship, he finally settled in St. John and became a land surveyor, artist, analytical chemist and a civil and mechanical engineer. His survey of the River St. John is still in vogue in the Crown land office of this province. His chemical knowledge ranged from analyzing ores to making his own whisky when overtaken by adversity."

"While operating as a mechanical engineer and owning a foundry he engaged the first steam ferryboat to cross St. John harbor, besides the first steam craft to ply the St. John river. Later on when Mr. Foulis was the engineer of the light and signal service of the government of New Brunswick, his principal charge being Partridge Island (at the harbor's entrance), whereon was an automatic fog bell, he proposed a steam whistle, steam whistles being then new to the world."

"Later on his suggestion was acted upon. There was no patent law then and though in his old age, blind and poor, he was given no compensation, and the inventor of the foghorn died in poverty."

**Suspended Animation.**

It has been determined that the fluids of insect bodies, for instance, freeze at 41 degrees Fahrenheit, any vital function becoming impossible at this temperature. At temperatures between this point and the temperature at which death will occur, a strange condition of suspended animation exists, the organism being, as it were, between life and death. In such a state the vital functions stop work, and as there is no activity in the body, no food is required. Animals placed in this state are readily restored by the gradual rise in temperature. This condition can be compared with that of a clock with stopped pendulum, the mechanism of which could be at any moment started again by a slight impulse given to the pendulum.

**The Reason.**

"Why are Indians more stoical in the face of death than white men?"

"That's easy. Indians are accustomed to dying."

**Country With a Future.**

Americans frequently fail to appreciate the size of Australia and the number of its people. This great continent has an area of 1,418,320 square miles within the tropical zone, and 1,825,331 square miles within the temperate zone. It has 5,000,000 people, almost wholly of British origin.

**Poverty and Disease.**

Investigations into the working and living conditions of the 30,000,000 wage-earners of the United States have revealed many things which are deplorable, especially among the unskilled low-paid group of workers. In spite of recent improvement in many industrial establishments the fight against unsanitary conditions is still an uphill one. Recent sanitary surveys show that the elimination of health hazards from industry is not a thing to be expected in the near future.

**Saved Off Sermon.**

A fool always boasts of what he is going to do, but an old hen always lays the egg before she cackles.—Llanapols Star.

**MADE TO MATCH COSTUME**

Umbrella is Now One of the Most Important Accessories of Woman's Dress.

So important is it that the umbrella should fit in with one's costume that umbrella designers are ever offering something new. The important features of fashion are to be seen in many details of umbrella construction.

Among the latest models are those showing the use of striped borders on colored umbrellas. Narrow border stripes in self and in contrasting colors are seen, as also are handsome broad satin stripes in self color backed with a black-and-white design. As a rule the stripe is placed about an inch from the edge of the umbrella.

Rich plaids are used extensively to form the entire umbrella. Plaids in vivid shades are employed to form the border on a plain colored canopy.

Wood shanks still hold good. Many models, however, will be made with a rod having a heavy club end. Very often a note of color is introduced in the club.

**High Effective.**

Tulle is very popular for trimming purposes. This is, no doubt, because of the high effects desired. The tulle can be looped and wired quite successfully to give any height one may desire.

# THANKSGIVING

**G**OD be merciful unto us, and bless us; and cause his face to shine upon us; Selah. That thy way may be known upon Earth, thy saving health among all nations. Let the people praise Thee, O God; let all the people praise Thee. Then shall the Earth yield her increase; and God, even our own God, shall bless us. God shall bless us; and all the ends of the Earth shall fear him.

From the 67th Psalm.

## PRAISE HIM for This Most Precious Gift

ON an evening of this week it occurred to a man, sitting alone in an upper room, that Thanksgiving day was right at hand. So he bestowed his mind to consider those things for which an American might sensibly offer up gratitude to God.

He reflected that across the Atlantic millions of human beings were at that very moment engaged in the dreadful task of killing other human beings with every invention which ingenuity and skill could bring forth from the laboratories of science and the workshops of industry.

In other lands at that very moment tens of thousands upon tens of thousands of helpless folk—feeble, aged men and women, mothers with babies clinging convulsively to their breasts, little children sobbing in terror, a vast army of the innocent and the unguished—were enduring the excruciating of exposure, of hunger, and of despair as they fled from their wasted farmsteads and burning villages, escaping from the pitiless cruelty of savage men only to lie down to suffer and die under the pitiless skies of God in the winter and the bitter storms.

At that very moment most dreadful war had laid its hand on the blackness of its darkness and from that horrid cloud rained destruction upon unhappy Europe upon her ancient capitals, upon her pleasant cities, upon her villages, her fields, her temples, her treasures of art, upon all the accumulations of a thousand years of genius, of learning, of industry, of skill and of patient advancement of the happiness and the civilization of the race of man.

So he that considered all this wickedness that was being done under the sun, this drunken dance of death and hell above the field corpses and the multitudinous graves, this awful nightmare of indescribable war and wrath, said in the bitterness of his heart that no God ruled over such a human world and there was no thanksgiving due to the giver of gifts that were not good, but everyone altogether evil.

And when the man had made an end of his thinking, he went and stood in a window and looked out upon the evening, because it was fair to see.

He saw in vision at that instant the vastness of the republic and the multitude of the good and happy folk who live under the shelter of its strength. He collected how brief a time had thus unguished the works of our pioneer fathers and our pioneer mothers, those brave and simple men and women whose names should never be mentioned with anything but profound gratitude.

And to this American, glad with a great pride in the deeds of his people and the story of his country, and grateful to the Goodness which has guided and sheltered his fathers and his folk, lifted up his eyes to the night, to the quiet stars, to the brooding immensity above, and said in his heart:

"Thank God that I am an American!"

And, citizens, that is the one outstanding, splendid fact for which each one of us should soberly and most gratefully thank God on Thanksgiving day this year.

The finest thing you possess or ever can possess is just your American citizenship. It is neither necessary nor becoming, on this day or on any other day, to cheapen this birthright of ours by being or spreading declaration.

But it is highly becoming on this Thanksgiving day to feel a deep gratitude and a manly pride in this heritage.

### WHERE THEY CALL HIM "CHARLIE."

Charles M. Schwab, the Bethlehem steel king, is probably the most beloved "boss" in America. His men say there would be no strikes if others were like him. "The American Magazine" prints an article about him in which this occurs:

"They call him 'Charlie' at Homestead; he is 'Charlie' when he goes back there now to visit the boys. Those who were there in the old days he still knows by name, and just how long they have been on the job. When he went down to Homestead to see weekly, after resigning as president of the Carnegie Steel company, five thousand

men turned out in a body to wish him good luck. 'God bless you, Charlie!' Here's good luck to you, Charlie!" they shouted.

"Do I know him well?" said one grizzled employee at Homestead. "Sure, don't I mind the first day he came here? An' didn't I work with him for years? Wid him, mind you. Not for him. Sure, I helped out the first piece of steel that ever went out of this mill. There isn't a man here that don't give his good will to Charlie Schwab. There'd be no strikes in America if I say boss was like him. The first day he come I says to him, says I, 'Have you match?' 'I have four,' says he, 'an' you're wel-

come to him," he says. 'Thanks!' says I. 'What's your name?' 'It's Schwab,' says he. 'Glad to know you, says I. An' faith, he'd give me a match today as quick as he was after givin' it to me then.'"

THE BRUTE.

Mrs. Willis—Wake up, John! Wake up! Mr. Willis—What's the matter?

Mrs. Willis—I hear a harsh, grating noise. I think someone is trying the door.

Mr. Willis—Nonsense. It's some rat trying that cake you made today.—Life.

Much Trouble.

Onyx—My wife burst into a flood of tears the other night.

Bronx—Did she cause any trouble?

Onyx—I should say so. Swept away forty-eight dollars for a new hat in the first torrent.—Chaparral.

How British Army Gets Its Mail.

The British may pride themselves on the efficiency of their transport of both men and mails. One of the biggest armies ever raised in any country has been conveyed over the sea without the loss of a single mail, and a prodigious amount of mail matter is handled with similar effectiveness.

The army postal arrangements, which are on a vast scale, are working admirably. Letters sent from England to the expeditionary force in France take three days to reach men in billets and four days for soldiers in the trenches.

All letters for the troops are dealt with at the home base office in London, where the work of sorting is performed. There is a separate mail bag for every unit, both for letters and parcels. All the base shops are similarly treated. About 10,000,000 letters are dispatched to the armies every week and about three-quarters of a million parcels.

The mails are made up not only for the forces in France, but for the troops in Egypt, Saloniki, Mesopotamia, East Africa and other parts of the world. Colonial sections deal with colonial letters both at the London base office and at the front.

All the cross-channel routes are used, and three special trunks are run daily for the army mails

alone. The number of letters sent home from the front exceeds 5,000,000 weekly, and this vast correspondence has to be handled in the first instance at the base. The sorting is done in London. Several hundred women are employed in this work, and their numbers are increasing every day.

Investigations into the working and living conditions of the wage-earners of the United States has revealed many things which are deplorable, especially among the unskilled low-paid group of workers.

In spite of recent improvement in many industrial establishments the fight against insanitary conditions is still an uphill one. Recent sanitary surveys show that the elimination of health hazards from industry is not a thing to be expected in the near fu-

ture.

Of greater importance is the inability of a considerable proportion of the wage-earners of the country to maintain a healthful standard of living on the wages received. In all investigations the vicious circle of poverty as cause and effect of disease is found.

A fool always boasts of what he is going to do, but an old hen always lays the egg before she cackles.—Indianapolis Star.

## The Governor's Dilemma

By HAROLD CARTER

(Copyright, 1916, by W. G. Chapman.)

The governor was not playing the game as it should be played. That much was common talk at the capitol. It was all very well for him to take up an attitude of opposition to Boss Lloyd, but why had he run for governor under Lloyd's auspices? He must have known Lloyd was not giving away something for nothing.

There were some who justified the governor in claiming that a man could not get into political life at all unless he is willing to accept some shady backing. But Governor Peters had swung round the minute he took the oath of office, announced that he meant to be the "People's Governor," and fought Lloyd tooth and nail, and fought him to a standstill.

Peters had been Boss Lloyd's lawyer in the old days. He knew the secret tragedy of his life. Peters' wife had left him a few years after their marriage, taking with her their only child, a boy. Lloyd, with all his influence, had never heard of her since that day. Peters had still been trying to discover her when Lloyd happened to be in the city.

Peters had been a very quiet man. Few knew him; it was not till the papers were full of the life story of the new governor that it was known he was a married man, with a son at the State university. Lloyd, in particular, had not known. When he knew he set to work to get Peters in leading strings. And he had him. He excited as he walked up the hill toward the executive offices. He did not win when Governor Peters kept him waiting half an hour while he chatted with an old negro nurse, though other men would not have kept him waiting at all, and would have broken off any other interview immediately.

At last Lloyd was admitted into the governor's office. He sat down, triumph upon his face. Peters looked at him inquiringly. "Well, sir?" he asked.

"It ain't often I come here now, Mr. Peters," Lloyd began.

"Often enough for my requirements," answered the governor.

"Your requirements? Good Lord!" said the boss, breathing hard. "Ain't

the man who invented and installed the first steam foghorn died blind and in poverty despite his varied attainments and achievements in widely differing fields. He was John Foulis, a Scotchman, who came to St. John, N. B., in the early years of the last century.

An interesting description of this versatile Scot is given in a paper read before the St. John Historical society by William Murdoch, C. E. Murdoch says of Foulis:

"He was a nephew of the brothers Robert and Andrew Foulis of Glasgow, printers and publishers, whose productions were the admiration of all their contemporaries, and whose edition of Horace, published in 1744, was hung up sheet by sheet, in Glasgow, and a reward offered for the discovery of a single error."

"This claim of an intelligent breed was a disgrace of Glasgow university. After various experiences when a young man, even to serving as surgeon on a whaling ship, he finally settled in St. John and became a land surveyor, artist, analytical chemist and a civil and mechanical engineer. His survey of the River St. John is still in vogue in the Crown land office of this province. His chemical knowledge was of great use in analyzing ores to making his own whisky when overtaken by adversity."

"While operating as a mechanical engineer and owning a foundry he engaged the first steam ferryboat to cross St. John harbor, besides the first steam craft to ply the St. John river. Later on, when Mr. Foulis was the engineer of the light and signal service of the government of New Brunswick, his principal charge being Partridge Island (at the harbor's entrance), whereon was an automatic fog bell, he proposed a steam whistle, steam whistles being then new to the world."

"Later on his suggestion was noted upon. There was no patent law then and though he was an old age, blind and poor, he was given no compensation, and the inventor of the foghorn died in poverty."

Suspended Animation.

It has been determined that the fluids of insect bodies, for instance, freeze at 41 degrees Fahrenheit, any vital functions becoming impossible at this temperature. At temperatures below this point and the temperature at which death will occur, a strange condition of suspended animation exists, the organism being, as it were, between life and death. In such a state the vital functions stop work, and as there is no activity in the body, no food is required. Animals placed in this state will readily restore by the gradual rise in temperature. This condition can be compared with that of a clock with stopped pendulum, the mechanism of which could be at any moment started again by a slight impulse given to the pendulum.

The Reason.

"Why are Indians more stoical in the face of death than white men?"

"That's easy. Indians are accustomed to dying."

Country With a Future.

Americans frequently fail to appreciate the size of Australia and the number of its people. The great continent has an area of 1,419,320 square miles within the tropical zone, and 1,525,261 square miles within the temperate zone. It has 5,000,000 people, almost wholly of British origin.

## MILLINERY MODES LESS FANTASTIC

Season's Styles Show Improvement Over Those of the Previous Years.

FELT LIKELY TO BE POPULAR

Indications That Velvet Has About Had Its Day of Popularity—Russian and Arabian Suggestions Mark Headgear—Bullion Ornamentation Leads.

New York.—At least, there is this to be said in regard to the fashionable fashions: it is the simplest that the milliners have demanded in several seasons. That rakish tilt or the suggestion of them that have governed millinery during the last few years were difficult beyond measure to achieve.

We have some backward farther than usual this season for an inspiration for new fashions, and the artistry and variety of the centuries that reached up from the Norman conquest to the days of Catherine de Medici have been overhauled to make an American costume and to France, American dollars.

Turning to Felt Predicted.

It is a very probable that we will wear more felt as the season advances than we thought was advisable at the beginning of the season. Of course, velvet stands as the first choice, but there are thousands who are wearing already of this fabric which sweeps over the continent with the thickens of autumn, and a plague of insects as soon as August reaches its maximum heat. At any rate, these sweeping felt hats of the milliners are a relief from the ordinary velvet hats.

This hat is quite exclusive. It is like a tilted saucer. The top surface is one piece, rising a bit in the middle. The brim leaves the head entirely free, it passes the crown. The color is pure black like the felt satin, the ornamentation consists of peacock eyes laid flat on the satin. But there is the really odd touch, very oriental: Beneath the upturned brim at the back there extends a piece of satin folded like a turban that reaches across the ears and folds up, folding it in place and reaching across the forehead back of the head is a conspicuous barrette of white and ruby crystals. Here is the Persian touch, for true, and if it sounds garish to you, wait until you see it on the right woman. It makes another hat in the afternoon seem commonplace.

Hats on Eastern Lines.

There are also high embroidered velvet and satin hats that have been copied from native Russian costume, also the Arabian suggestions made by Bakst. These shapes rest squarely on the head, showing not a flicker of hair except over the ears and at the extreme back, and the brim reaches out and up, coming to four points well above the crown.

Large Hat With Bird of Paradise.—The hat is of brown velvet with a broad brim. The bird of paradise is a jay, with its tail feathers of fresh-colored chiffon, fastened at the waist with roses.

Cockade No Longer Worn.

The cockade that was the chief ornament last winter has disappeared. It was done to death and we needed something new. The wired bows that France liked in the summer have never appeared in the American taste, and for very good reason; the acknowledgment that none but the Parisienne knew how to carry off this seemingly simple treatment of a hat with skill. Nothing but a low sound so simple; whereas, the diction should run, anything but a bow.

The newest idea of the milliners is bound to reach a poorly harvest. This is the assembling of a matched group of articles that beguile the extra dollars out of the pocket. A hat, for instance, then a shopping bag, a neckpiece and sometimes spurs to carry the scheme from crown to heel.

Even when the collar does not match the hat in material, it is arranged to bring about complete harmony between the two, and the perceptible advantage is so apparent to a woman that she cannot refrain from accepting the milliner's suggestion.

(Copyright, 1916, by the McClure Newspaper Syndicate.)

BANDBOX MUST BE CORRECT

Old Idea That Anything Will Do as Holder for Hat Does Not Hold Today.

Her accessories betray her a gentleman. And what, pray, is the most in accessories? Why, the "bandbox" sort of bandbox, one that is not only practical, but a "joy forever" as well. It is a confusion in hand-painted satin. It is rich black with stiff "wooden" looking garden varieties daubed all over its shiny surface. It is lined with pale pink satin, and that is all.

If you would have another, lend it to the sports hat. Make it in rose material, lined in blue. Make it in the center and along the edge of the lid in generous stitches of wool embroidery in old blue. Do not omit the lumpy strap across the top; make it of self-material, attach it here and there with the wool, and you have another "joy." And now for your "best" hat.

Its box must be a veritable dream in ivory satin and silver cloth. On a black velvet hat with satin arrange "cut-outs" of silver cloth in conventionalized designs of the lotus and the tulip. Outlined in black chenille, the effect is striking. Line it with the satin; attach a tiny silk cord where the side and bottom join. It is too adorable to stick away in a dark closet. It is intended for a decorative accessory to a charming bodice.

Seasonable Negligees.

They are of soft French brist, and they feel good these brisk autumn mornings.

The flannel is warm, not too heavy, and comes in unusually pretty colorings.

The wrappers are simply made, some finished with scalloping, others with satin bands.

Deep violet, soft lavender, pinks and blues are the shades—a woman may take her choice.

White Kids Washable.

Much to milady's gratification, smart white kid boots, which are so fashionable today, are washable, just as the gloves may scrub with pure white soap and warm water. Before going to bed she puts shoe trees in her boots and bathes them, and in the morning, presto, behold, they are spotless and fresh as new.

High Effects.

Tulle is very popular for trimming purposes. This is, no doubt, because of the high effects desired. The tulle can be looped and wired quite successfully to give any height one may desire.

The Jersey Frock.

It is popular as chic. Comes in woolen or silk. Is best liked in the darker shades. And is variously trimmed with fur, braid and metal embroidery.

MADE TO MATCH COSTUME

Umbrella Is Now One of the Most Important Accessories of Woman's Dress.

So important is it that the umbrella should fit in with one's costume that umbrella designers are ever offering something new. The important features of fashion are to be seen in many details of umbrella construction.

Among the latest models are those showing the use of stripes. Stripes in self and in contrasting colors are seen, as also are handsome broad stripes in self color backed with a black-and-white design. As a rule the stripe is placed about an inch from the edge of the umbrella.

Rich plaids are used extensively to form the entire umbrella. Plaids in vivid shades are employed to form the border on a plain colored umbrella.

Wood shades still hold good. Many models, however, will be made with a rod having a heavy club end. Very often a note of color is introduced in

the club to match the handle and the fancy border of the silk.

As to the length of umbrella handles, there is no set size. For sports styles the eight-inch length is the favorite, especially when combined with more practical forms of decoration.

For more practical forms of decoration, from ten to twelve inches in length. There is a wide range of ornaments used to finish off the handles. Among them are loops, silk rings, finger rings, chains finished with balls, silk tassels and jade rings.

High Effects.

Tulle is very popular for trimming purposes. This is, no doubt, because of the high effects desired. The tulle can be looped and wired quite successfully to give any height one may desire.

Dated Nov. 20th, 1916.  
By the Court:  
J. J. JEFFERY,  
County Judge.

Nov. 27 Nov. 23

**NOTICE OF APPLICATION FOR FINAL SETTLEMENT**  
Wood County Court—In Probate.

In the Matter of the Estate of John Wertz, late of said county, deceased. Written Verdict by J. R. Racan, administrator representing among other things that he has fully administered the said estate, and praying that a time and place be fixed for examining and allowing his account of his administration, and that the residue of the said estate be assigned to such persons as may be lawfully entitled to the same.

**IT IS ORDERED** That said application be heard before this court, at a regular term thereof to be held at the probate office, in the city of Grand Rapids, on the 20th day of December, 1916, at 10 o'clock a. m.

**AND IT IS FURTHER ORDERED**, that notice of the time and place of examining and allowing said account and of assigning the residue of said estate be given to all persons interested by publication of a copy of this order, for three successive weeks, in the Grand Rapids Tribune, a newspaper published in said county, before the day next for said hearing.

Dated this 25th day of November, 1916.
